Brand: Moimhear | Model: LDB00042

1. INTRODUCTION

Thank you for choosing the Moimhear Low Bunk Bed. This instruction manual provides essential information for the safe assembly, operation, and maintenance of your new children's bed. Designed with a solid pine wood frame and a safety ladder, this bunk bed offers a secure and versatile sleeping solution for children. The lower bed features an open concept, allowing it to function as both a sleeping area and a play space. Please read this manual thoroughly before beginning assembly and retain it for future reference.

2. SAFETY INFORMATION

Your child's safety is paramount. Please adhere to the following guidelines:

- The top bunk is equipped with 29 cm high safety rails to prevent falls. Ensure these are correctly installed and maintained.
- The maximum weight capacity for both the upper and lower beds is 120 kg. Do not exceed this limit.
- Always use the provided ladder for accessing the upper bunk. Do not allow children to climb on other parts of the bed frame.
- Ensure all screws and fasteners are tightened securely during assembly and checked periodically for tightness.
- **Avoid using power tools for assembly** as they can overtighten and damage the wood, compromising the bed's structural integrity.
- The top bunk is not suitable for children under 6 years of age.
- Do not attach or hang items on any part of the bunk bed that are not designed for use with the bed; for example, but not limited to, hooks, belts, or jump ropes.

- Ensure the mattress used on the top bunk is not thicker than 12 cm to maintain adequate safety rail height.
