# WALI CS202N 2-Tier Floating TV Shelf Instruction Manual

Brand: WALI | Model: CS202N

## INTRODUCTION

Thank you for choosing the WALI CS202N 2-Tier Floating TV Shelf. This manual provides essential information for the safe and efficient installation, operation, and maintenance of your new wall-mounted shelf. Please read these instructions thoroughly before beginning installation and retain them for future reference.

## SAFETY INFORMATION

**WARNING:** Failure to follow these safety instructions may result in property damage or personal injury.

- Do not exceed the maximum weight capacity of 22 lbs (10 kg) per shelf. Overloading can cause instability and damage.
- Always follow the included instructions for proper installation and mounting to ensure safety and stability.
- Ensure the mounting surface (wall) can safely support the combined weight of the shelf and all attached equipment.
- Use appropriate tools and hardware for your specific wall type (e.g., brick, concrete, wood stud, drywall).
- Keep children and pets away from the installation area during setup.
- Periodically check all screws and connections to ensure they remain tight and secure.

## PACKAGE CONTENTS

Verify that all components are present and undamaged before beginning installation. If any parts are missing or damaged, please contact WALI customer support.

## SETUP AND INSTALLATION

Follow these steps carefully to install your WALI Floating TV Shelf.

### 1. Assemble the Shelf Unit:

Attach the two shelves to the central mounting bracket using the provided hardware. Ensure all connections are secure. The shelves are designed to fit snugly into the bracket.

**3. Mark Drill Holes:**

Hold the assembled shelf unit against the wall at the desired height and use a pencil to mark the positions for the drill holes through the central mounting bracket.

**4. Drill Holes and Insert Anchors:**

Drill pilot holes at the marked locations. For drywall, insert the appropriate wall anchors. For wood studs, brick, or concrete, use the recommended drill bit size and anchors as per the hardware kit instructions.

## OPERATING INSTRUCTIONS (USAGE)

---

The WALI CS202N Floating TV Shelf is designed for versatile use in various settings.

- **Placement of Devices:** Place DVD/Blu-Ray players, satellite/cable boxes, game consoles, routers, Hi-Fi and surround speakers, or other media accessories on the shelves. Ensure the weight distribution is even and does not exceed the 22 lbs (10 kg) per shelf capacity.
- **Cable Management:** Utilize the two wire holes on both sides of each shelf to route cables neatly. This helps to conceal wires, maintain an organized appearance, and prevent clutter.
- **Adjustable Height:** The shelf can be mounted at any desired height to suit your entertainment system setup and free up floor space.

# CABLE MANAGEMENT

Thanks to the hollow design on the back, cables can be hidden away, ensuring a neat appearance.

## MAINTENANCE

---

To ensure the longevity and appearance of your WALI Floating TV Shelf, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the shelves with a dry, soft cloth to remove dust and fingerprints. Avoid using abrasive cleaners or harsh chemicals, as these may damage the wood finish.
- **Inspection:** Periodically inspect all mounting screws and connections to ensure they are tight. Re-tighten if necessary to maintain stability.
- **Weight Limit:** Always adhere to the maximum weight capacity of 22 lbs (10 kg) per shelf to prevent damage or accidents.

## TROUBLESHOOTING

---

If you encounter any issues with your WALI Floating TV Shelf, refer to the following common solutions:

- **Shelf feels wobbly after installation:**

- Ensure all mounting screws are fully tightened into the wall and the shelf components.
- Verify that appropriate anchors were used for your specific wall type. Drywall anchors may require specific installation techniques to ensure maximum hold.
- Check if the wall itself is structurally sound. If mounting to drywall without a stud, ensure the anchors are rated for the weight you intend to place on the shelf.

- **Cables are not neatly organized:**

- Utilize the integrated cable management holes on each shelf.
- Consider using cable ties or clips (not included) to bundle and secure excess cable length behind the shelf or along the wall.

- **Shelf appears to be bending or sagging:**

- Immediately remove items from the shelf.
- Check if the total weight on the shelf exceeds the maximum capacity of 22 lbs (10 kg).
- Re-inspect the installation for any loose connections or signs of structural fatigue in the wall or shelf components.
