pouseayar Black 3 Tier NSF Metal Shelf Wire Shelving Unit Instruction Manual

Model: B0CL6F3ZPR | Brand: pouseayar

1. Introduction

Thank you for choosing the pouseayar Black 3 Tier NSF Metal Shelf Wire Shelving Unit. This manual provides comprehensive instructions for the safe and efficient assembly, operation, and maintenance of your new shelving unit. Please read this manual thoroughly before beginning assembly or use, and retain it for future reference.

This heavy-duty adjustable storage rack is designed for versatile use in various environments, including garages, kitchens, offices, and warehouses, offering robust storage solutions with a high load capacity.

2. Important Safety Information

To ensure safe operation and prevent damage, please adhere to the following safety guidelines:

- Do not exceed the maximum load capacity of 1050 lbs for the 3-tier configuration (350 lbs per shelf, evenly distributed).
- Always place heavier items on the bottom shelf to maximize stability and prevent tipping.
- Ensure the shelving unit is placed on a level and stable surface. Use the adjustable leveling feet to compensate for uneven ground.
- Keep the shelf unit dry to prevent rust and maintain its structural integrity. Wipe with a dry cloth for cleaning.
- Do not climb on the shelving unit.
- Keep small children and pets away from the unit during assembly and use.
- Inspect the unit periodically for any loose parts or damage. Tighten connections as needed.

3. Package Contents

Please verify that all components listed below are included in your package before beginning assembly. If any parts are missing or damaged, please contact customer support.

- 2 x Shelf Units (each unit includes 3 shelves)
- Leveling Feet (4 per unit, total 8)
- Shelf Liners (3 per unit, total 6)

- Support Rods (8 per unit, total 16, with threaded insert preassembled)
- Tapered Locks (48 + 2 extra per unit, total 96 + 4 extra)
- Connectors (4 per unit, total 8, for extending to 6-tier configuration)

4. Setup and Assembly

Assembly of the pouseayar shelving unit is designed to be straightforward and requires no tools. It is recommended to assemble with another person for ease and safety.

1. **Prepare Components:** Unpack all components and lay them out. Ensure you have all parts as listed in Section 3.
2. **Attach Leveling Feet:** Screw the leveling feet into the bottom of the four support rods. Ensure they are securely tightened.
3. **Mark First Shelf Height:** Determine the desired height for your bottom shelf. Snap the tapered locks onto the grooves of the support rods at the same height for all four rods. Ensure the 'TOP' arrow on the tapered lock points upwards.
4. **Install First Shelf:** Slide the first wire shelf down over the support rods until it rests firmly on the tapered locks. Ensure the shelf is level and all four corners are securely seated.

5. **Repeat for Subsequent Shelves:** Repeat steps 3 and 4 for the remaining shelves, adjusting the height of the tapered locks in 1-inch increments as desired for each shelf.
6. **Adjust Leveling Feet:** Once all shelves are installed, place the unit in its desired location. Adjust the leveling feet by twisting them to stabilize the unit on uneven ground. Tighten to the right to lower, loosen to the left to raise.
7. **Apply Shelf Liners (Optional):** Place the transparent shelf liners on top of the wire shelves for a solid surface and added protection.

5. Operation and Usage

Your pouseayar shelving unit is designed for heavy-duty storage and organization. Here are key aspects of its operation and versatile usage:

- **Load Capacity:** Each shelf can hold up to 350 lbs when weight is evenly distributed. The total maximum load capacity for a 3-tier unit is 1050 lbs. For optimal stability, always place heavier items on lower shelves.
- **Adjustable Design:** Shelves can be adjusted in 1-inch increments along the support rods, allowing you to customize the spacing to accommodate items of various sizes.
- **Versatile Expansion:** This unit is extensible. With additional components (sold separately or from another unit), you can combine two 3-tier units to create a taller 6-tier shelving system with a maximum load capacity of 2100 lbs.
- **NSF Certified:** The shelving unit is NSF certified, ensuring it meets strict standards for public health protection, particularly for use in environments where food safety and sanitation are critical.
- **Applications:** Ideal for use in commercial settings, garages, closets, kitchens, pantries, offices, and warehouses for organizing tools, supplies, food items, and more.

6. Maintenance

Proper maintenance will extend the life and appearance of your shelving unit:

- **Cleaning:** Wipe the shelving unit with a dry cloth to remove dust and debris. For stubborn dirt, a slightly damp cloth can be used, but ensure the unit is thoroughly dried immediately afterward to prevent rust.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish.
- **Regular Inspection:** Periodically check all connections, especially the tapered locks and leveling feet, to ensure they remain tight and secure.
- **Moisture Protection:** While shelf liners offer some moisture resistance, avoid prolonged exposure to excessive moisture to prevent potential damage to the metal components.

7. Troubleshooting

If you encounter any issues with your shelving unit, please refer to the following common troubleshooting tips:

- **Unit is Wobbly:** Ensure the unit is on a flat surface. Adjust the leveling feet until the unit is stable and does not wobble. Verify that all shelves are properly seated on their tapered locks.
- **Shelf Not Level:** Check that the tapered locks for the affected shelf are all at the same height and securely snapped into the grooves on each support rod.
- **Difficulty Assembling:** Ensure you are following the assembly steps in order. If tapered locks are difficult to snap on, ensure they are correctly oriented with the 'TOP' arrow pointing upwards. A rubber mallet can gently assist in seating shelves, but avoid excessive force.
- **Missing Parts:** If any parts are missing from your package, please refer to Section 9, Customer Support, for assistance.

8. Specifications

Feature	Detail
Product Dimensions	18"D x 48"W x 48"H (per unit)

Feature	Detail
Number of Shelves	3 per unit (Set of 2 units included)
Weight Limit (per shelf)	350 lbs (evenly distributed)
Total Weight Limit (3-tier)	1050 lbs
Total Weight Limit (6-tier extended)	2100 lbs
Material	Heavy Steel Wire
Finish Type	Glossy Black
Special Feature	NSF Certified, Adjustable Shelves, Extensible Design, Includes Shelf Liners
Assembly Required	Yes (Tool-free assembly)
Included Components	2 Shelf Units, Leveling Feet, Shelf Liners

9. Warranty Information

pouseayar products are manufactured to high-quality standards. For specific warranty details regarding your shelving unit, please refer to the product listing on the retailer's website or contact pouseayar customer support directly. Please retain your proof of purchase for any warranty claims.

10. Customer Support

If you have any questions, require assistance with assembly, or need to report missing/damaged parts, please contact pouseayar customer support. You can typically reach us via the 'Buyer Message' system on the platform where you purchased the product. Please provide your order number and a detailed description of your inquiry for prompt assistance.
