Kask Utopia Y Bike Helmet Instruction Manual

Model: CHE00104-210-056

1. PRODUCT OVERVIEW

The Kask Utopia Y is a helmet designed for road cycling and triathlon, focusing on aerodynamic performance and ventilation. It incorporates advanced safety features and a comfortable fit system.

- **Aerodynamic Design:** Engineered for reduced drag and enhanced speed.
- **Advanced Safety:** Rotational Impact WG11 approved, exceeding international safety standards for rotational impacts.
- **Ventilation:** Features internal padding fibers that aid in moisture evaporation and temperature regulation.
- **Comfort Octo Fit:** A micro-dial adjuster with gel pads provides a secure and comfortable fit.

2. SETUP AND FITTING

Proper helmet fit is crucial for safety and comfort. Follow these steps to ensure your Kask Utopia Y helmet is correctly adjusted.

- 1. Initial Placement:** Place the helmet squarely on your head, ensuring it covers your forehead. It should not be tilted back, exposing your forehead, or pushed too far forward, obstructing your vision.
- 2. Adjusting the Octo Fit System:** Locate the rubberized micro-dial adjuster at the back of the helmet. Turn the dial clockwise to tighten the fit or counter-clockwise to loosen it. Adjust until the helmet feels snug but comfortable, without excessive pressure points. The helmet supports oscillate freely through 180 degrees to conform to your head shape.
- 3. Strap Adjustment:** Adjust the side straps so that they form a 'V' shape just below your ears. The strap dividers should sit flat against your skin.
- 4. Chin Strap Buckle:** Fasten the chin strap buckle. Tighten the chin strap until it is snug under your chin, allowing only one or two fingers to fit between the strap and your chin.
- 5. Final Check:** With the straps fastened, try to move the helmet from side to side and front to back. The helmet should move with your skin and not slide independently. If it moves significantly, re-adjust the Octo

Fit system and straps.

3. OPERATING AND SAFE USE

The Kask Utopia Y helmet is designed to provide protection during cycling activities. Adhere to the following guidelines for safe operation.

- **Always Wear Your Helmet:** Ensure your helmet is properly fitted and fastened before every ride.
- **Intended Use:** This helmet is designed for road cycling and triathlon. It is not intended for motor sports or other activities.
- **Impact Protection:** The helmet is constructed to absorb the force of an impact by partially destroying the shell and liner. Even if damage is not visible, a helmet that has sustained an impact should be replaced immediately.
- **Visibility:** The helmet includes high visibility reflective inserts to enhance safety in low light conditions. However, always use appropriate lighting and reflective gear when riding in poor visibility.
- **Temperature Regulation:** The helmet's ventilation system and internal padding are designed for thermal comfort. Ensure proper airflow by not obstructing vents.

4. MAINTENANCE AND CARE

Proper maintenance extends the life of your helmet and ensures its protective capabilities.

- **Cleaning the Exterior:** Use a soft cloth, mild soap, and water to clean the outer shell. Avoid abrasive cleaners, solvents, or harsh chemicals, as these can damage the helmet's materials and compromise its integrity.
- **Cleaning the Interior Padding:** The internal padding can be removed for washing. Hand wash with mild soap and water, then air dry completely before reinserting into the helmet. Ensure all padding is correctly re-attached.
- **Storage:** Store the helmet in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid storing it near heat sources or in enclosed spaces like car trunks on hot days, as excessive heat can damage the helmet's protective materials.
- **Inspection:** Regularly inspect your helmet for any signs of damage, such as cracks in the shell, dents, or frayed straps. If any damage is found, or if the helmet has been involved in an impact, replace it immediately.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your helmet.

- **Helmet feels too loose or too tight:** Adjust the Octo Fit micro-dial system at the back of the helmet. Ensure the chin strap is snug but not uncomfortably tight.
- **Straps are uncomfortable or rub:** Re-adjust the side strap dividers to ensure they form a 'V' shape just below your ears and lie flat against your face. Ensure the chin strap is centered.
- **Helmet makes noise while riding:** Check that all straps are properly secured and not flapping. Ensure the helmet is correctly positioned and not vibrating due to an improper fit.
- **Excessive sweating or discomfort:** Ensure the helmet's vents are not obstructed. The internal padding is designed to wick moisture; ensure it is clean and properly installed.
- **Visible damage after an impact:** Even minor impacts can compromise the helmet's protective capabilities. If your helmet has sustained any impact, it must be replaced, regardless of visible damage.

6. SPECIFICATIONS

Feature	Detail
Brand	Kask
Model Name	CHE00104-210-056
Color	Black
Size	Small
Age Range	Adult
Outer Material	Polycarbonate (PC)
Inner Material	Resistex carbon
Special Feature	Adjustable Strap
Recommended Uses	Cycling
Item Dimensions	16 x 10 x 9 inches

7. WARRANTY AND SUPPORT

The Kask Utopia Y Bike Helmet comes with a Limited Warranty. For specific details regarding warranty coverage, terms, and conditions, please refer to the documentation provided with your purchase or contact Kask customer support.
