TROUBLESHOOTING

If you encounter any issues with your bar table, refer to the following common solutions:

Table is Unstable or Wobbles:

- **Check Adjustable Feet:** Ensure all four adjustable feet are properly installed and adjusted to compensate for uneven flooring. Turn them clockwise or counter-clockwise until the table is stable.
- **Verify Connections:** Confirm that all screws and bolts connecting the frame and tabletop are securely tightened. Loose connections can cause instability.
- **Anti-Tip Kit:** If the table is placed against a wall, ensure the anti-tip kit is correctly installed and secured.
