Targus Universal Laptop Lock Dual Lock Security Cable Key Combination 2 Meter - User Manual

Model: ASP64MKGLX

INTRODUCTION

The Targus Universal Slot Laptop Lock is a versatile and secure solution designed to protect your valuable laptop or notebook. This 2-meter long, 5mm diameter steel cable with a red PVC coating offers dual locking through a combination lock and a key lock. It comes with convenient accessories, such as a hook-and-loop strap and three different thickness notebook secure spacers for various laptop and notebook models, ensuring compatibility with a wide range of devices.

Figure 1: Overview of the Targus Universal Laptop Lock, showing the red cable, key lock, and combination lock components.

PACKAGE CONTENTS

Please ensure all items are present in the package:

- Targus Universal Laptop Lock (2-meter steel cable with red PVC coating, integrated key lock and combination lock)
- Two (2) Keys for the key lock
- One (1) Hook-and-loop cable strap
- Three (3) Notebook secure spacers of varying thicknesses

SETUP

1. Checking Compatibility

The slot mechanism measures 6 x 6 mm when closed. Before use, verify that your laptop or notebook has a compatible security slot. Use the provided secure spacers to ensure a snug fit if needed.

2. Setting Your Combination (Initial Setup)

The lock is factory preset to 0-0-0-0. To set your personal 4-digit combination:

1. Ensure the lock is open and set to the current combination (factory default is 0-0-0-0).
2. Locate the reset button/mechanism. This is typically a small button or a rotatable part on the side or bottom of the combination lock unit.

Figure 2: Identify the combination reset mechanism, often a small button or a rotatable slot.

3. Using a small pointed object (like a pen tip) or the key, press and hold the reset button, or rotate the reset mechanism 90 degrees clockwise (or as indicated by the lock design).

Figure 3: The key can be used to engage the reset mechanism for the combination lock.

4. While holding the reset button/mechanism, set your desired 4-digit combination by rotating the number wheels. Choose a memorable combination.

Figure 4: Rotate the number wheels to set your desired 4-digit combination.

5. Release the reset button/mechanism. Your new combination is now set.
6. **Important:** Write down your new combination and store it in a safe place. Without the combination, the lock cannot be opened.

OPERATING THE LOCK

Using the Combination Lock

1. To Lock:

- Insert the lock head into the security slot on your laptop.
- Rotate the lock head 90 degrees to secure it.
- Scramble the number wheels to a random combination to lock the device.

2. To Unlock:

- Align the number wheels to your preset 4-digit combination.
- Rotate the lock head 90 degrees to release it from the security slot.
- Pull the lock head out of the slot.

Using the Key Lock

1. To Lock:

- Insert the lock head into the security slot on your laptop.
- Rotate the lock head 90 degrees to secure it.
- Insert the key into the keyhole and turn it clockwise to lock.

Figure 5: The key lock mechanism, ready for key insertion.

- Remove the key.

2. To Unlock:

- Insert the key into the keyhole and turn it counter-clockwise to unlock.
- Rotate the lock head 90 degrees to release it from the security slot.
- Pull the lock head out of the slot.

Adjusting Cable Loop

The loop end of the cable is adjustable. You can slide the lock mechanism along the cable to create a larger or smaller loop, allowing you to secure the cable to various immovable objects such as a desk leg or a heavy piece of furniture. Use the included hook-and-loop strap to neatly manage any excess cable length, preventing tangles and maintaining a tidy workspace.

MAINTENANCE

- Keep the lock mechanisms clean and free from dust and debris.
- Avoid exposing the lock to extreme temperatures or harsh chemicals.
- Periodically check the cable for any signs of wear or damage. If the cable or lock mechanism appears damaged, discontinue use.

TROUBLESHOOTING

Problem	Possible Cause / Solution
Cannot set new combination.	Ensure the lock is open and set to the current combination (factory default 0-0-0-0). Make sure the reset button/mechanism is fully engaged while setting the new combination.
Combination lock will not open.	Verify that you are entering the correct 4-digit combination. Ensure each number wheel is precisely aligned with the indicator marks. Try slightly wiggling the wheels.
Key lock will not open/close.	Ensure the key is fully inserted and turned correctly. Check for any obstructions in the keyhole. Do not force the key.
Lock head does not fit into laptop slot.	Confirm your laptop has a standard 6x6mm security slot. Try using one of the provided secure spacers to achieve a better fit. If it still doesn't fit, your device may have a different type of security slot.

SPECIFICATIONS

Feature	Detail
Brand	Targus
