Philips Hue 582221

Philips Hue Secure Desktop Stand User Manual

Model: 582221

Brand: Philips Hue

INTRODUCTION

The Philips Hue Secure Desktop Stand is an accessory specifically designed for use with Philips Hue Secure wired cameras. This stand allows for stable placement of your camera on any flat surface, such as a desk, shelf, or table. Its design ensures a clean aesthetic by discreetly hiding the camera's charging cable, blending seamlessly into your home or office decor. This manual provides essential information for setting up, operating, and maintaining your desktop stand.

WHAT'S IN THE BOX

Your Philips Hue Secure Desktop Stand package includes the following items:

- One (1) Philips Hue Secure Desktop Stand (Black)
- Documentation (User Manual, Safety Information)

Follow these steps to set up your Philips Hue Secure Desktop Stand and integrate your camera:

1. **Unpack the Stand:** Carefully remove the desktop stand from its packaging.
2. **Prepare Your Camera:** Ensure your Philips Hue Secure wired camera is ready for placement.
3. **Insert Camera:** Gently place your Philips Hue Secure wired camera into the designated slot on the desktop stand. The stand is designed to securely hold the camera.
4. **Cable Management:** Route the camera's charging cable through the integrated channel in the stand. This feature helps to conceal the cable for a tidy appearance.
5. **Position the Stand:** Place the desktop stand with the camera on a flat, stable surface where you intend to monitor. The weighted base provides stability.
6. **Connect to Power:** Connect the camera's power cable to an electrical outlet.
7. **Hue App Setup:** For full functionality, ensure your Philips Hue Secure camera is connected and configured within the Philips Hue app. This allows for easy installation and setup of your camera's features.

Easy to install and set up in the Hue app

OPERATING INSTRUCTIONS

The Philips Hue Secure Desktop Stand enhances the functionality of your Philips Hue Secure wired camera by providing optimal placement and stability. Once your camera is securely placed on the stand and configured in the Philips Hue app, you can utilize its various features for home security and monitoring.

Camera Features (when used with stand):

- **Motion Detection and Alerts:** Receive instant, motion-activated alerts on your mobile device when the camera detects movement.
- **Night Vision:** Philips Hue Secure cameras adjust to dim light levels automatically with night vision to deliver a clear picture day and night.
- **Two-Way Talk:** Utilize the camera's speaker and microphone for two-way communication, allowing you to speak with visitors or deter intruders.
- **Integration with Hue Lighting:** When connected to a Philips Hue Bridge, your camera can trigger lights to turn on automatically when motion is detected, enhancing security and convenience.
- **Live Streaming and Recording:** Monitor your home in real-time with crisp, clear 1080p HD live streams and recording capabilities.

End-to-end encryption that keeps your data safe

Let your system help you feel safer when you're away

Monitor your home inside and out

Image: A user receiving an instant motion-activated alert from their Philips Hue Secure camera on their mobile device.

Get notifications when your cameras detect suspicious activity

Create Activity and Package zones to get the alerts you want to see. With a Secure plan, your alert will show you if motion detected by your camera was from a person, animal, vehicle, or package.

Compatible Philips Hue Secure Cameras:

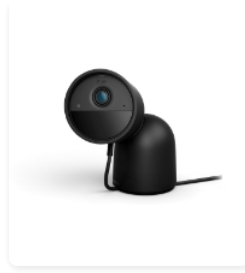

- Philips Hue Secure Wired Camera - Black

- Philips Hue Secure Wired Camera - White

- Philips Hue Secure Wired Camera with Desktop Stand (as a bundle)

- Philips Hue Secure Floodlight Camera

MAINTENANCE

To ensure the longevity and appearance of your Philips Hue Secure Desktop Stand, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the stand with a soft, dry, or slightly damp cloth. Avoid using abrasive cleaners, solvents, or strong chemicals, as these can damage the finish.
- **Placement:** Ensure the stand is always placed on a stable, flat surface to prevent accidental tipping.
- **Cable Care:** Periodically check the camera's cable for any signs of wear or damage. Ensure it remains properly routed within the stand's cable management channel.

TROUBLESHOOTING

If you encounter any issues with your Philips Hue Secure Desktop Stand, consider the following common troubleshooting steps:

- **Camera Instability:** Ensure the stand is on a completely flat and level surface. Verify that the camera is fully seated within the stand's slot.
- **Cable Not Hiding Properly:** Check that the cable is correctly routed through the designated channel. Avoid forcing the cable, which could cause damage.
- **Camera Functionality Issues:** If the camera itself is not functioning (e.g., no video, no alerts), refer to the Philips Hue Secure camera's specific user manual or the Philips Hue app for troubleshooting steps related to the camera's operation and connectivity. The desktop stand is a passive accessory and does not directly affect camera electronics.

For more complex issues or technical support related to your Philips Hue Secure camera system, please refer to the official Philips Hue support resources.
