4.3. Initial Power-On

After installation, reconnect vehicle power and turn on the ignition. The unit should boot up to the Android interface.

Follow any on-screen prompts for initial setup.

4.4. Sound Activation (If No Sound)

If you experience no sound after installation, please refer to the following video for a solution. This typically involves connecting the RCA cable to the AMP-C cable and activating the AMP function in the settings.

Video: This video provides a solution for troubleshooting no sound after installing the Maserati Android Screen. It demonstrates how to connect the RCA cable to the AMP-C cable and activate the AMP function in the settings to enable audio output.

5. OPERATING INSTRUCTIONS

5.1. Navigation

The unit features built-in GPS for navigation. Access the navigation application from the main menu. You can use pre-installed maps or download your preferred navigation apps like Google Maps, Waze, or iGo Maps from the Play Store.

Image: The GPS Navigation interface is displayed, showing a map with a route and icons for Google Maps, Waze Maps, and iGo Maps. This illustrates the unit's navigation capabilities.

5.2. CarPlay and Android Auto

Connect your smartphone via Bluetooth for wireless CarPlay/Android Auto or use a wired USB connection. This feature mirrors your phone's interface to the car radio, allowing access to calls, messages, music, and navigation apps directly from the unit.

Image: This image shows the car radio displaying both Wireless & Wired CarPlay and Android Auto interfaces. Two smartphones are shown, one connected to CarPlay and the other to Android Auto, demonstrating the seamless integration of mobile devices.

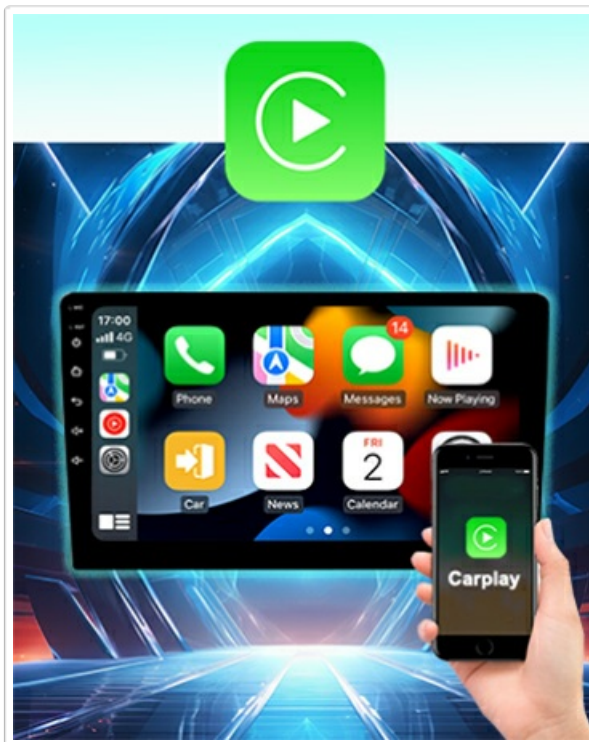

Image: A close-up of the CarPlay interface on the car radio screen, showing various iOS applications.

5.3. Bluetooth 5.0

Pair your phone via Bluetooth for hands-free calling and audio streaming. The unit supports automatic synchronization of your phone book for easy access to contacts.

ASVEGE

Built-in CarPlay

Support carplay to use mobile data transmission image technology to realize the interconnection between cars and mobile phones, Realize perfect interaction between automotive networking applications and dual screens.

Image: The Bluetooth 5.0 interface is shown on the car radio screen, featuring a dial pad for making calls and indicating active Bluetooth connection.

5.4. Radio and Multimedia

Enjoy AM/FM radio with RDS functionality. The unit supports various multimedia formats for playing 1080P videos and high-definition pictures. Access these features through the respective applications on the main menu.

5.5. Sound Settings (DSP)

Utilize the built-in Digital Sound Processor (DSP) to customize your audio experience. Adjust equalizer settings, bass enhancement, and surround sound to your preference.

5.6. Climate Control

The unit integrates with your vehicle's original climate control system, allowing you to manage heating and air conditioning directly from the touchscreen interface.

More Multimedia Features

Image: This image highlights multiple multimedia features of the car radio, including voice control, integration with steering wheel controls, a 360-degree panoramic view, and AHD 1080P backup camera support.

6. MAINTENANCE

To ensure optimal performance and longevity of your ASVEGE car radio:

- Regularly clean the screen with a soft, lint-free cloth. Avoid harsh chemicals.
- Keep the software updated to the latest version for improved features and security.
- Avoid exposing the unit to extreme temperatures or direct sunlight for prolonged periods.

7. TROUBLESHOOTING

If you encounter any issues with your car radio, please refer to the following common troubleshooting tips:

- **No Power:** Check all power connections and vehicle fuses. Ensure the ignition is on.
- **No Sound:** Verify that the RCA cable is correctly connected to the AMP-C cable and the AMP function is enabled in the device settings. Refer to the 'Sound Activation' video in Section 4.4.
- **Touchscreen Unresponsive:** Try restarting the unit. If the issue persists, check for any physical damage or debris on the screen.

- **GPS Signal Issues:** Ensure the GPS antenna is properly installed and has a clear view of the sky.
- **Bluetooth Connectivity Problems:** Ensure Bluetooth is enabled on both the car radio and your smartphone. Try unpairing and re-pairing the devices.

For further assistance, please contact ASVEGE customer support.
