BrickBling 10293

BrickBling LED Light Kit for LEGO Santa's Visit 10293 Christmas House

Instruction Manual

INTRODUCTION

This instruction manual provides detailed guidance for installing and operating your BrickBling LED Light Kit, designed specifically for the LEGO Santa's Visit 10293 Christmas House model. This kit is intended to enhance the visual appeal of your LEGO set with integrated lighting. Please read all instructions carefully before beginning installation.

SAFETY INFORMATION

WARNING: Choking Hazard - Small parts. Not for children under 3 years.

The light kit operates on a safe 5V low voltage. Ensure all connections are secure and wires are not pinched during installation to prevent damage. Keep the product away from water as it is not water resistant.

PACKAGE CONTENTS

Before starting, verify that all components listed below are present in your package. The LEGO model is not included with this light kit.

- Light Kit components
- Power Supply (USB cable or battery box compatible)

OPERATING INSTRUCTIONS

Once the light kit is fully installed, you can power it using a USB port or AAA batteries (not included).

- **Power Connection:** Connect the provided power supply to a compatible USB power source (e.g., power bank, USB wall adapter) or insert AAA batteries into the battery box.
- **Activation:** The lights will illuminate upon connection to power.
- **Control:** If your kit includes a remote control (check package contents), use it to adjust light settings such as brightness or effects.

MAINTENANCE

To ensure the longevity and optimal performance of your BrickBling LED Light Kit, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the LED components and wires with a dry, soft cloth. Avoid using liquids or abrasive cleaners.
- **Storage:** When not in use, store the LEGO model with the light kit in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Handling:** Handle the wired connections and small LED components with care to prevent damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Lights do not turn on.	No power, loose connection, or faulty component.	Check power source (USB or batteries). Ensure all wires are securely connected. Verify battery orientation if using a battery box.
Some lights are not working.	Damaged wire or LED, or loose connection.	Carefully inspect the affected wires and LEDs for damage. Re-seat any loose connections.
Lights flicker.	Unstable power supply or loose connection.	Try a different USB power source or fresh batteries. Check all connections for tightness.

SPECIFICATIONS
