## MONOKEI STND87

# MONOKEI Standard Keyboard User Manual

Model: STND87 | Color: Blush Pink with Brown Switches

## 1. PRODUCT OVERVIEW

The MONOKEI Standard Keyboard is a mechanical keyboard designed for a versatile typing experience. It features a durable construction, hot-swappable switches, and multiple connectivity options.

## 2. SETUP

---

### 2.1 Unboxing and Contents

Carefully remove the keyboard and accessories from the packaging. The box should contain:

- MONOKEI Standard Keyboard
- USB-C Cable
- Keycap Puller

### 2.2 Initial Connection

The MONOKEI Standard Keyboard supports both wired and wireless (Bluetooth) connectivity.

#### Wired Connection:

1. Connect the provided USB-C cable to the port on the keyboard.
2. Connect the other end of the USB-C cable to an available USB port on your computer.
3. The keyboard will be recognized automatically by your operating system.

#### Wireless (Bluetooth) Connection:

1. Ensure the keyboard is charged or connected via USB-C for initial setup.
2. Turn on the keyboard's Bluetooth mode (refer to the Operating section for specific key combinations).
3. On your device (PC, laptop, smartphone, tablet), navigate to Bluetooth settings.
4. Search for available devices and select 'MONOKEI Standard' to pair.
5. Follow any on-screen prompts to complete the pairing process.

### 2.3 Charging

Connect the USB-C cable to the keyboard and a power source (e.g., computer USB port, wall adapter). The keyboard can operate for up to 30 days on a full charge in wireless mode.

## 3. OPERATING INSTRUCTIONS

---

### 3.1 Basic Key Functions

The MONOKEI Standard Keyboard features a standard 87-key layout. All alphanumeric keys, symbols, and basic modifiers (Shift, Ctrl, Alt, Fn) function as expected.

### 3.2 Special Function Keys

The F1-F12 keys may have secondary functions when pressed in combination with the 'Fn' key. Refer to the keycap legends for specific media controls or system functions.

### 3.3 Operating System Mode Switching

The keyboard may default to a specific operating system layout (e.g., Mac). To switch between operating system modes (e.g., Windows/Mac), use the designated hotkey combination. Consult the included quick start guide for the specific key sequence.

### 3.4 Switching Between Paired Devices

If multiple devices are paired via Bluetooth, use the designated function keys (often Fn + 1, 2, or 3) to

switch between them quickly.

## 4. MAINTENANCE

---

### 4.1 Cleaning the Keyboard

To clean the keyboard, power it off and disconnect it from your device. Use a soft, lint-free cloth lightly dampened with water or a mild cleaning solution. Avoid spraying liquids directly onto the keyboard. For cleaning between keycaps, use compressed air or a small brush.

### 4.2 Keycap and Switch Replacement

The MONOKEI Standard Keyboard features hot-swappable sockets, allowing for easy replacement of switches without soldering. To replace keycaps or switches:

1. Gently remove the keycap using the provided keycap puller.
2. Once the keycap is removed, use a switch puller (not included, but often bundled with replacement switches) to carefully extract the switch from its socket.
3. Align the pins of the new switch with the holes in the PCB and press firmly until it clicks into place.
4. Place the desired keycap onto the new switch stem.

***Note:** Opening the keyboard casing may void the warranty. Exercise caution if considering internal modifications.*

## 5. TROUBLESHOOTING

---

### 5.1 Connectivity Issues

- **Keyboard not connecting via Bluetooth:** Ensure Bluetooth is enabled on both the keyboard and your device. Try unpairing and re-pairing the keyboard. Ensure the keyboard is sufficiently charged.
- **Wired connection not recognized:** Try a different USB port or cable. Ensure the cable is fully inserted into both the keyboard and the computer.

### 5.2 Keys Not Responding

- **Individual keys:** If a single key is not responding, the switch may be faulty or improperly seated. Try removing the keycap and switch, then re-inserting the switch firmly. If the issue persists, consider replacing the switch.
- **Multiple keys:** Ensure the keyboard is properly connected (wired or wireless). Restart your computer or device. If using wireless, check battery level.

### 5.3 Charging Issues

- Ensure the USB-C cable is securely connected to both the keyboard and a working power source.
- Try a different USB-C cable or power adapter.
