# Saiyin Sound Bar

## USER MANUAL

### Introduction

The Saiyin Sound Bar is designed to provide a truly immersive audio experience, transporting you into your favorite movies, shows, and music. With advanced audio technology, this home audio sound bar delivers dynamic and powerful sound, filling any room with crystal clear audio. Whether you're watching a movie, playing a game, or listening to music, this TV speaker provides an unparalleled audio experience.

It features four powerful drivers, including double 2-inch tweeters and double 2.75-inch woofers, ensuring a well-balanced and immersive sound. Multiple connectivity options are available, such as Bluetooth, HDMI ARC, Optical, and AUX, allowing seamless connection to various devices like TVs, computers, and projectors. Its extremely stylish design allows for versatile placement, either on a table or wall-mounted.

## Connecting Your Sound Bar

The Saiyin Sound Bar offers multiple connectivity options:

- **HDMI ARC:** Connect an HDMI cable (not supplied) from the sound bar's HDMI ARC port to the HDMI ARC port on your TV. Ensure you use the port labeled HDMI ARC, not a standard HDMI port.
- **Optical:** Use the included optical cable to connect the sound bar to your TV's optical audio output.
- **AUX:** Use the included 3.5mm audio cable to connect to devices with an AUX output.
- **Bluetooth:** Pair your smartphone, tablet, or other Bluetooth-enabled device wirelessly to stream audio.

## Maintenance and Care

To ensure the longevity and optimal performance of your Saiyin Sound Bar, follow these simple care guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the sound bar. Avoid using abrasive cleaners, waxes, or solvents as they may damage the finish.
- **Placement:** Keep the sound bar away from direct sunlight, heat sources, and excessive moisture. Ensure proper ventilation around the unit.
- **Handling:** Handle the sound bar with care to prevent accidental drops or impacts, which could damage internal components.

## Troubleshooting

If you encounter issues with your Saiyin Sound Bar, please refer to the following common solutions:

- **No Sound or Poor Sound Quality:**
  - Ensure all cables (HDMI ARC, Optical, AUX) are securely connected to both the sound bar and your TV/device.
  - Verify that your TV's audio output is set to the correct source (e.g., HDMI ARC, Optical).
  - **Important:** For optical or HDMI ARC connections, you may need to change your TV's audio output format setting to **PCM** and disable Dolby/DTS on your TV, Netflix, Amazon Prime Video, HBO, Hulu, YouTube, or other streaming video apps. This sound bar is not compatible with Dolby or DTS audio formats.
  - Check the volume levels on both the sound bar and your connected device/TV.
- **Remote Control Not Working:**
  - Ensure the batteries are correctly inserted and not depleted. Replace batteries if necessary.

- Make sure there are no obstructions between the remote control and the sound bar's sensor.

- **Bluetooth Pairing Issues:**

- Ensure the sound bar is in Bluetooth pairing mode.
- Disable Bluetooth on other nearby devices that might be trying to connect.
- Move your Bluetooth device closer to the sound bar (Bluetooth range is up to 10 meters).
