## LawnMaster 951950

# Lawnmaster Original Replacement Blade User Manual

For Cordless Lawn Mower (VBRM 16)

## 1. INTRODUCTION

This user manual provides essential information for the safe and effective installation, operation, and maintenance of your Lawnmaster Original Replacement Blade for the VBRM 16 Cordless Lawn Mower. Please read this manual thoroughly before attempting any installation or maintenance procedures to ensure proper function and safety.

## 2. IMPORTANT SAFETY INFORMATION

**WARNING: Always disconnect the lawn mower from its power source (remove battery) before performing any installation, maintenance, or cleaning procedures. Blades are extremely sharp and can cause severe injury.**

- Wear heavy-duty gloves when handling the blade.
- Ensure the mower is stable and cannot move during blade replacement.
- Keep hands and feet away from the blade area.
- Store replacement blades in a safe place, out of reach of children.
- Dispose of old blades responsibly according to local regulations.

## 3. INSTALLATION (BLADE REPLACEMENT)

### 3.1. Components Overview

The replacement blade kit includes the blade itself and new screws for secure attachment.

Image: Lawnmaster replacement blade and accompanying screws.

Image: Close-up view of the sharp cutting edge of the replacement blade.

## 3.2. Step-by-Step Installation

1. **Prepare the Mower:** Ensure the lawn mower is turned off and the battery is completely removed. Place the mower on a stable, flat surface, preferably upside down, to access the blade area safely.
2. **Locate the Blade Assembly:** Identify the existing blade and its mounting screws on the underside of the mower.

Image: Underside of the Lawnmaster robotic mower, highlighting the blade assembly area.

3. **Remove the Old Blade:** Using an appropriate wrench or screwdriver, carefully loosen and remove the screws holding the old blade in place. Keep the screws for disposal with the old blade.
4. **Clean the Blade Area:** Before installing the new blade, clean any grass clippings or debris from the blade mounting area to ensure a flush fit.
5. **Install the New Blade:** Position the new Lawnmaster replacement blade onto the mower's blade hub, ensuring it is correctly aligned. Use the new screws provided with the replacement blade.
6. **Secure the Blade:** Tighten the new screws firmly. Do not overtighten, but ensure the blade is securely fastened to prevent loosening during operation.
7. **Final Check:** Once the new blade is installed, manually rotate it a few times (with gloves) to ensure it spins freely and is properly seated.

## 4. OPERATING WITH THE NEW BLADE

After installing the new Lawnmaster replacement blade, reinsert the battery into your VBRM 16 Cordless Lawn Mower. The new blade is designed to restore optimal cutting performance. For best results, ensure your lawn is free of obstacles before mowing. Regular use will maintain the sharpness of the blade for a period, but eventual replacement will be necessary as part of routine maintenance.

Image: The Lawnmaster robotic mower in operation on a well-maintained lawn.

## 5. MAINTENANCE

Proper maintenance of your Lawnmaster replacement blade ensures longevity and consistent cutting quality.

- **Regular Cleaning:** After each use, or as needed, disconnect the mower from power and carefully clean any grass clippings or debris from the blade and the underside of the mower. This prevents buildup that can affect performance and balance.
- **Inspect for Damage:** Periodically inspect the blade for signs of wear, nicks, bends, or cracks. A damaged blade can lead to uneven cuts, increased vibration, and potential safety hazards. Replace the blade immediately if any damage is observed.
- **Blade Sharpening:** While these are replacement blades, if you choose to sharpen them, ensure it is done by a qualified professional to maintain proper balance and cutting angle. Improper sharpening can damage the blade and mower.
- **Storage:** When not in use for extended periods, ensure the blade is clean and dry before storing the mower in a cool, dry place.

## 6. TROUBLESHOOTING

This section addresses common issues related to blade performance.

Problem	Possible Cause	Solution
Uneven cut or poor cutting performance	Dull or damaged blade; improper blade installation; grass too long or wet.	Inspect blade for damage and replace if necessary. Ensure blade is installed correctly and securely. Mow dry grass and adjust cutting height.
Excessive vibration during operation	Unbalanced or bent blade; loose blade screws; debris caught in blade assembly.	Disconnect power, inspect blade for bends or damage and replace. Tighten blade screws. Clean blade assembly area.
Blade not spinning freely	Debris obstructing blade; blade installed incorrectly.	Disconnect power, remove any obstructions. Re-install blade ensuring correct alignment and tightness.

## 7. SPECIFICATIONS

Key specifications for the Lawnmaster Original Replacement Blade (Model 951950).

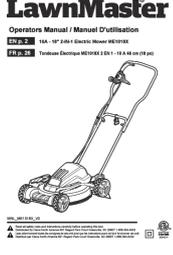

Feature	Detail
Product Dimensions (L x W x H)	6.3 x 3.2 x 8.7 cm; 100 grams
Item Model Number	951950
Manufacturer	CLEVA
ASIN	B0CLGFFWC9
Power Type	DC (for compatible mower)
Spare Parts Availability	Information unavailable on spare parts

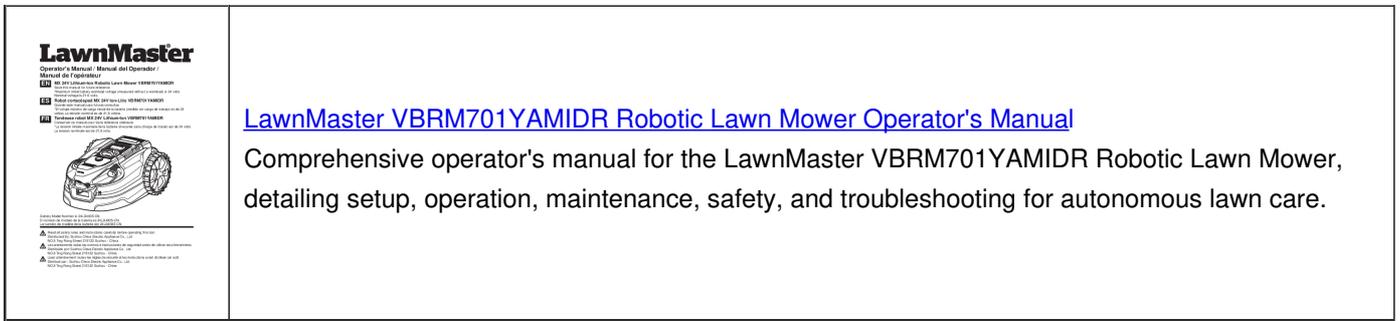

## 8. WARRANTY AND SUPPORT

This Lawnmaster replacement blade is designed for durability and performance. For specific warranty information regarding your purchase, please refer to the terms and conditions provided by your retailer at the time of purchase. Generally, products purchased from Amazon come with a return policy.

- **Return Policy:** This product is eligible for a 30-day refund/replacement policy when purchased from Amazon. Please check your order details for specific return instructions.
- **Customer Support:** For further assistance, technical support, or inquiries about your Lawnmaster product, please contact Lawnmaster customer service or the retailer from whom you purchased the blade.
