3. SETUP

3.1. Assembling the Stand

1. Carefully remove the monitor and stand components from the packaging.
2. Attach the stand base to the stand column, securing it with the provided screw.
3. Mount the assembled stand to the back of the monitor, ensuring it clicks securely into place or is fastened with screws as per the quick setup guide.

3.2. Connecting Cables

Ensure the monitor and your computer are powered off before making any connections.

- **Power Cable:** Connect one end of the power cable to the monitor's power input and the other end to a power outlet.
- **Video Cable:** Connect either the HDMI or DisplayPort cable from your computer's video output to the corresponding input on the monitor.
- **USB Cable:** Connect the upstream USB cable from your computer to the monitor's USB upstream port to enable the monitor's USB hub functionality.

3.3. Powering On

After all cables are connected, power on your computer, then press the power button on the monitor. The monitor should automatically detect the input signal.

4. OPERATING THE MONITOR

4.1. Control Buttons

The control buttons are typically located on the rear or bottom right side of the monitor. These buttons allow you to navigate the On-Screen Display (OSD) menu and adjust settings.

4.2. On-Screen Display (OSD) Menu

Press the 'Menu' button to access the OSD. Use the navigation buttons to browse through options such as Picture Settings, Color Settings, Input Select, and System Settings. Press 'Enter' or the corresponding button to select an option and 'Exit' to leave the menu.

4.3. Input Selection

If you have multiple devices connected, use the 'Input' button or navigate through the OSD menu to select the desired input source (HDMI, DisplayPort).

4.4. Picture Adjustments

Within the OSD, you can adjust various picture settings:

- **Brightness/Contrast:** Adjust the overall luminance and difference between light and dark areas.
- **Color Settings:** Modify color temperature, gamma, and individual RGB levels.
- **Sharpness:** Enhance or soften image details.
- **Aspect Ratio:** Select between various display modes (e.g., Full, 1:1).

4.5. Ergonomic Adjustments

The monitor stand allows for various ergonomic adjustments to optimize your viewing experience:

- **Height Adjustment:** Raise or lower the monitor to eye level.

- **Tilt:** Adjust the screen's vertical angle (forward/backward).
- **Swivel:** Rotate the monitor horizontally on its base.
- **Pivot:** Rotate the screen 90 degrees for portrait viewing.

5. MAINTENANCE

5.1. Cleaning the Monitor

- Always unplug the monitor from the power outlet before cleaning.
- Use a soft, lint-free cloth lightly dampened with water or a mild, non-abrasive screen cleaner.
- Do not spray cleaner directly onto the screen.
- Avoid using benzene, thinner, ammonia-based cleaners, or abrasive materials, as these can damage the screen surface.

6. TROUBLESHOOTING

If you encounter issues with your monitor, refer to the following common problems and solutions:

- **No Power:** Ensure the power cable is securely connected to both the monitor and a working power outlet. Check the power indicator light on the monitor.
- **No Signal:** Verify that the video cable (HDMI or DisplayPort) is correctly connected to both the monitor and

your computer. Ensure the correct input source is selected via the OSD menu.

- **Flickering or Distorted Image:** Check the video cable for damage. Ensure your computer's graphics card drivers are up to date. Try adjusting the refresh rate or resolution in your computer's display settings.
- **Image Too Dark/Bright:** Adjust the brightness and contrast settings in the OSD menu.
- **Colors Incorrect:** Reset color settings to default in the OSD, or adjust color temperature and individual RGB values.

If the problem persists after trying these steps, contact technical support.
