SETUP

Setting the Combination Lock

The smell proof bag comes with a pre-set combination lock. To set your personal combination:

1. Ensure the lock is set to the default combination (usually 0-0-0).
2. With the lock open, locate the small reset button (often a tiny pinhole) on the side or bottom of the lock mechanism.
3. Use a pen or a pointed object to press and hold the reset button.
4. While holding the button, set your desired 3-digit combination by rotating the dials.
5. Release the reset button. Your new combination is now set.
6. Test the new combination by scrambling the numbers and then entering your new code to open the lock.

Organizing the Bag with Adjustable Dividers

The bag features adjustable hook-and-loop dividers, allowing you to customize the interior layout to suit your storage needs. Simply detach and reattach the dividers to create compartments of various sizes for your accessories.

OPERATION

Using the Smell Proof Bag

The bag is designed with multiple layers, including an activated carbon lining and a rubberized sealed zipper, to effectively contain odors. Ensure the zipper is fully closed and the combination lock is engaged for maximum smell-proof performance and security.

Using the Grinder

The included grinder is a multi-piece design, typically featuring sharp teeth for grinding, a mesh screen for sifting, and a collection chamber for finer particles. To use, place material between the top two sections, close, and twist. Collect the ground material from the main chamber and any sifted material from the bottom chamber.

Using the Rolling Tray

The rolling tray provides a clean and contained surface for preparing your materials. Its raised edges help prevent spills and keep

your workspace tidy.

Using the Glass Stash Jar and Smell Proof Tube

The glass stash jar and smell proof tube are designed for additional discreet and odor-contained storage of smaller items. Ensure their lids are securely fastened to maintain their smell-proof properties.

MAINTENANCE

Cleaning the Smell Proof Bag

To maintain the effectiveness of the smell proof bag, wipe the exterior with a damp cloth and mild soap if necessary. Do not submerge the bag in water or machine wash, as this can damage the activated carbon lining and water-resistant features. Allow to air dry completely.

Cleaning Accessories

- **Grinder:** Disassemble the grinder and use a small brush or toothpick to remove any residue from the teeth and chambers. For a deeper clean, use isopropyl alcohol and rinse thoroughly with water. Ensure it is completely dry before reassembling.
- **Rolling Tray:** Wipe clean with a damp cloth. For sticky residue, use a small amount of rubbing alcohol.
- **Glass Stash Jar & Smell Proof Tube:** These can be washed with warm soapy water and rinsed thoroughly. Ensure they are completely dry before use to prevent moisture buildup.
- **Resealable Odour Proof Bags:** These bags are generally disposable. If reusable, wipe the interior with a damp cloth and allow to air dry.

TROUBLESHOOTING

Lock Not Opening

- Ensure you are entering the correct 3-digit combination.
- Verify that each number is precisely aligned with the indicator marks.
- If you have forgotten your combination, there is no universal master key or reset code. You may need to try all 1000 possible combinations (000-999) or contact customer support for further assistance.

Faint Odor Detected

- Ensure the zipper is fully closed and the lock is engaged.
- Check that all internal containers (jars, tubes, bags) are securely sealed.
- The activated carbon lining absorbs odors over time. If the bag has been exposed to strong odors for extended periods, it may require airing out in a well-ventilated area for a few hours.
- Ensure the items stored inside are dry and properly contained within their individual smell-proof accessories before placing them in the main bag.
