Troubleshooting

If you encounter any issues with your desk, refer to the following common problems and solutions:

- **Desk Not Moving:**
  - Check if the power cord is securely plugged into both the desk and the wall outlet.
  - Ensure there are no obstructions preventing the desk from moving up or down.
  - Try resetting the desk by unplugging it for 30 seconds and then plugging it back in.

- **Uneven Movement:**

  - Verify that the desk is placed on a level surface.
  - Check for any loose screws in the frame or legs and tighten them.

- **Error Code on Display:**

  - Refer to the specific error code in a more detailed product manual if available. Often, a simple reset (unplugging and replugging) can resolve temporary errors.

- **Noise During Operation:**

  - A slight motor sound is normal. If the noise is excessive or unusual, check for any loose components or obstructions.
