## Waring BB300

# Waring Commercial BB300 Blade 1 HP Blender

Model: BB300

## INTRODUCTION

The Waring BB300 Blade Series 1 HP Blender is designed for commercial use, offering robust performance for busy environments. It features a powerful 1 HP motor with easy-to-use toggle switch controls, including a pulse function. The unit comes with a durable 48 oz BPA-free copolyester stacking container, engineered for efficient blending and convenient storage.

## SAFETY INFORMATION

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and/or injury, including the following:

- Read all instructions before operating the blender.
- Do not touch moving parts. Keep hands and utensils out of the container while blending to prevent severe injury and/or damage to the blender.
- Ensure the lid is securely in place before operating the appliance.
- Unplug from outlet when not in use, before putting on or taking off parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been dropped or damaged in any manner.
- The use of attachments not recommended or sold by Waring Commercial may cause fire, electric

shock, or injury.

- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.

## SETUP

Before first use, wash the blender jar, lid, and blade assembly in warm, soapy water. Rinse thoroughly and dry. Place the motor base on a stable, flat surface. Ensure the unit is unplugged before placing the jar onto the motor base. The jar should sit securely on the motor base, aligning the drive coupling.

## INCLUDED WITH BB300

*Image: Diagram showing the 48 oz. copolyester jar and the 1 HP motor base with toggle switch, indicating included components.*

## OPERATING INSTRUCTIONS

The BB300 blender features simple toggle switch controls for ease of use. Always ensure the jar is properly seated and the lid is secure before operating.

### Controls:

- **OFF:** The center position of the toggle switch. Turns the blender off.

- **LOW:** Activates the blender at a lower speed for lighter blending tasks.
- **HIGH:** Activates the blender at a higher speed for more demanding blending tasks.
- **PULSE:** A momentary switch that provides short bursts of high-speed blending. Hold the switch down for continuous pulsing, release to stop.

## General Operation:

1. Add ingredients to the copolyester jar. Do not exceed the maximum fill line (48 oz).
2. Securely place the lid on the jar.
3. Plug the blender into a 120V, 5-15 phase outlet.
4. Select the desired speed (LOW or HIGH) by moving the left toggle switch. For quick bursts, use the PULSE switch on the right.
5. Blend until desired consistency is achieved.
6. Return the left toggle switch to the OFF position to stop blending.

## FEATURES

### MAINTENANCE AND CLEANING

Proper maintenance ensures the longevity and optimal performance of your Waring BB300 blender. Always unplug the unit before cleaning.

#### Cleaning the Jar and Lid:

- Wash the copolyester jar and lid immediately after each use to prevent food from drying on the surfaces.
- Hand wash with warm, soapy water using a non-abrasive sponge or cloth.
- Rinse thoroughly with clean water.
- Allow to air dry completely or dry with a soft cloth.

- The removable, rubberized jar pad on the motor base can be wiped down for easy cleanup.

## Cleaning the Motor Base:

- Wipe the motor base with a damp cloth. Do not immerse the motor base in water or other liquids.
- Do not use abrasive cleaners or scouring pads, as they may damage the finish.

## TROUBLESHOOTING

If your Waring BB300 blender is not operating correctly, consult the following common issues and solutions:

Problem	Possible Cause	Solution
Blender does not turn on.	Not plugged in; power switch is off; circuit breaker tripped.	Ensure unit is securely plugged into a working outlet. Turn power switch to ON. Reset circuit breaker if necessary.
Motor stops during operation.	Overheating due to heavy load or continuous operation.	The blender has built-in thermal protection. Unplug the unit and allow it to cool down for 10-15 minutes. Reduce load for future blending.
Ingredients not blending smoothly.	Too little liquid; too many solid ingredients; ingredients are too large.	Add more liquid. Reduce the amount of solid ingredients. Cut large ingredients into smaller pieces. Use the PULSE function to break down larger items.
Lid comes loose during blending.	Lid not securely fastened.	Ensure the lid is pressed down firmly and securely sealed before starting the blender.

## SPECIFICATIONS

Feature	Detail
Brand	Waring
Model Number	BB300
Motor	1 HP Commercial Motor
Controls Type	Toggle switch controls with HIGH, LOW, OFF and PULSE
Number of Speeds	2
Container Capacity	48 Fluid Ounces
