iSunirm 8FT Closet System (Model 8FT-B) Instruction Manual

Your guide to assembly, use, and care of your iSunirm Closet System.

INTRODUCTION

Thank you for choosing the iSunirm 8FT Closet System. This manual provides detailed instructions for the safe and efficient assembly, operation, and maintenance of your new closet organizer. Please read this manual thoroughly before beginning assembly and retain it for future reference.

SAFETY INFORMATION

To ensure safe assembly and use of your iSunirm 8FT Closet System, please observe the following precautions:

- Always follow the assembly instructions step-by-step.
- Ensure all hardware is securely fastened before use. Periodically check and tighten fasteners as needed.
- Due to the weight of the package (approximately 100 lbs) and the complexity of assembly, it is recommended that **two people install this item together**.
- Do not exceed the maximum weight capacity of 1000+ lbs for the entire system, or 150 lbs per shelf.
- Keep small parts and packaging materials away from children to prevent choking hazards.
- This system is designed for wall-mounting. Ensure it is securely anchored to a suitable wall structure to prevent tipping.

PACKAGE CONTENTS

Before beginning assembly, verify that all components are present and undamaged. If any parts are missing or defective, please contact iSunirm customer support.

- 3 Wooden Shelving Towers
- 3 Expandable Hanging Rods
- 3 Large Drawers
- 2 Storage Shelves (within the drawer unit)
- 1 Shoe Shelf

- All necessary installation assembly hardware

SETUP AND ASSEMBLY

The iSunirm 8FT Closet System is designed for adjustable installation to fit closets from 5 feet to 8 feet wide. The wooden shelving towers can be cut to fit smaller spaces (saws not included). The interior shelves and the left shelving tower are adjustable to accommodate longer garments.

Assembly Steps:

1. **Prepare the Area:** Clear the closet space and ensure you have adequate room to work. It is recommended to have a second person assist with assembly.
2. **Unpack Components:** Carefully unpack all parts and lay them out, checking against the package contents list.
3. **Assemble Shelving Towers:** Follow the detailed instructions provided in the separate assembly guide for constructing the three wooden shelving towers. Note that the towers can be cut to size if your closet is less than 8 feet wide.
4. **Install Drawers:** Assemble and install the three large drawers into the designated shelving tower, ensuring smooth slide rail operation.
5. **Mount to Wall:** Securely mount the shelving towers to the wall using the provided hardware. This is crucial for stability and safety.
6. **Install Hanging Rods:** Attach the three expandable hanging rods. These rods can be installed on only one side of the unit or trimmed for smaller closets. Ensure the built-in safety lock attachment is engaged for secure rod placement.
7. **Adjust Shelves:** Adjust the interior shelves and the left shelving tower to your desired height to accommodate various garment lengths.
8. **Install Shoe Shelf:** Place the shoe shelf in its intended position.

OPERATING INSTRUCTIONS

Your iSunirm 8FT Closet System is designed for versatile storage. Utilize the following features for optimal organization:

- **Hanging Rods:** The three expandable rods can hold approximately 60-80 clothes per rod. Adjust their length as needed by twisting clockwise to tighten and counter-clockwise to loosen.
- **Shelving Towers:** The three sturdy shelving towers provide ample space for folded clothes, bags, and accessories. Each shelf has a weight capacity of over 150 lbs.
- **Adjustable Shelves:** The interior shelves and the left shelving tower can be repositioned to accommodate longer items like coats or dresses.
- **Drawers:** The three large drawers offer concealed storage for private clothes, socks, or other items. They feature smooth slide rails for easy access.
- **Shoe Shelf:** Use the dedicated shoe shelf to keep footwear organized and accessible.

The entire system can hold approximately 350+ pieces of clothing, with a total weight capacity of over 1000 lbs.

Figure 4: Example of the closet system's storage capacity and organization.

MAINTENANCE

Proper maintenance will extend the life and appearance of your closet system:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Dusting:** Regularly dust all surfaces to prevent buildup.
- **Hardware Check:** Periodically inspect all screws, bolts, and connections to ensure they remain tight. Tighten any loose hardware to maintain stability.
- **Weight Distribution:** Distribute weight evenly across shelves and hanging rods to prevent stress on the structure.

TROUBLESHOOTING

If you encounter any issues with your iSunirm 8FT Closet System, refer to the following common solutions:

- **Missing or Defective Hardware:** If any hardware components are missing or defective upon arrival, please contact iSunirm customer support immediately for assistance.
- **Unstable Unit:** Ensure the unit is properly wall-mounted and all fasteners are tightened. Verify that the weight distribution is even and not exceeding the maximum capacity.
- **Drawers Not Sliding Smoothly:** Check for any obstructions in the drawer rails. Ensure the rails are properly aligned and lubricated if necessary.
- **Hanging Rods Sagging:** Confirm that the expandable rods are twisted clockwise to their tightened position and that the safety lock attachments are engaged. Reduce the load if it exceeds the recommended capacity.

SPECIFICATIONS

Feature	Detail
Brand	iSunirm
Model Number	8FT-B
Color	Black
Material	Metal, Wood
Item Dimensions (L x W x H)	96 x 16 x 75 inches
Item Depth	20 inches
