Novilla N-F12006-F-GR-New

Novilla Full Size Lift Up Storage Bed Instruction Manual

Model: N-F12006-F-GR-New

1. INTRODUCTION

This manual provides comprehensive instructions for the assembly, operation, and maintenance of your Novilla Full Size Lift Up Storage Bed. Please read all instructions carefully before beginning assembly and retain this manual for future reference. This bed frame features a hydraulic lift mechanism for convenient under-bed storage and a comfortable fabric headboard, designed to eliminate the need for a box spring.

2. SAFETY INFORMATION

- Always assemble the bed frame on a soft, clean surface to prevent damage.
- Ensure all parts are present and undamaged before assembly. Do not use damaged parts.
- Tighten all screws and bolts securely, but do not overtighten. Recheck tightness periodically.
- Keep children and pets away from the bed frame during assembly and when operating the hydraulic lift mechanism.
- The hydraulic lift mechanism is powerful. Use both hands to lift and lower the mattress platform. Ensure hands and fingers are clear of pinch points.
- Do not exceed the maximum weight capacity of 1000 lbs for the bed frame.
- Only lower the gas lift after the slats are installed.

3. PACKAGE CONTENTS

Please verify that all components listed below are present before beginning assembly. Refer to the included parts diagram for visual identification.

- Upholstered Headboard Panels
- Upholstered Side Rails
- Upholstered Footboard Panels
- Hydraulic Lift Mechanisms (2 sets)
- Metal Frame Components (various bars and connectors)
- Wood Slats and Slat Holders
- Mattress Retainer Bar
- Fabric Bottom Cover
- Assembly Hardware (screws, bolts, washers, Allen wrench, spanner)

4. ASSEMBLY INSTRUCTIONS

Follow these steps carefully for proper assembly. An assembly video is provided below for visual guidance.

Video: Novilla Lift Up Storage Bed Assembly Guide. This video demonstrates the step-by-step process for assembling the bed frame, including attaching the headboard, side rails, hydraulic mechanisms, and slats.

Step-by-Step Assembly:

1. **Assemble the Headboard Base:** Connect the lower headboard panels (parts 1, 2, 3, 4) using the specified screws (A, B). Ensure they are securely fastened.
2. **Attach Side Rails to Headboard Base:** Connect the side rail components (parts 5, 6, 8) to the assembled headboard base using screws (A, C, E).
3. **Install Hydraulic Mechanism Supports:** Attach the metal support bars (parts 9, 10, 11, 12, 13) for the hydraulic lift mechanism to the side rails using screws (G).
4. **Connect Side Rails to Footboard:** Attach the side rails to the footboard (part 7) using bolts (D). Ensure the frame is square before fully tightening.
5. **Secure Hydraulic Mechanisms:** Install the hydraulic lift mechanisms (part 21) to the bed frame using screws (F, H). Attach the mattress retainer (part 22) to the footboard.
6. **Attach Crossbars to Hydraulic Mechanism:** Connect the crossbars (part 16) to the hydraulic lift mechanism using screws (F).
7. **Install Central Support Bars:** Attach the central support bars (part 17) to the hydraulic mechanism.
8. **Assemble Main Support Beam:** Connect the two halves of the main support beam (parts 15, 23) by sliding them together.
9. **Attach Main Support Beam to Frame:** Secure the assembled main support beam to the bed frame.
10. **Connect Additional Crossbars:** Attach additional crossbars (parts 18, 19) to the main support beam using screws (F).
11. **Install Remaining Crossbars:** Connect the remaining crossbars (parts 14, 18) to the frame using screws (F).
12. **Install Fabric Bottom Cover:** Attach the fabric bottom cover (part 28) to the inside of the bed frame using the Velcro strips. This creates the base for the storage area.
13. **Insert Wood Slats:** Place the slat holders (part 25) onto the metal frame. Insert the wood slats (part 27) into the holders. Ensure all slats are evenly spaced and securely seated.

14. **Attach Mattress Retainer Strap:** Secure the mattress retainer strap (part 29) to the bed frame. This prevents the mattress from sliding when the lift mechanism is engaged.

5. OPERATING INSTRUCTIONS

Using the Hydraulic Lift Storage:

Your Novilla bed frame features a hydraulic lift mechanism for easy access to under-bed storage. This mechanism is designed to assist in lifting the mattress and platform, making storage convenient.

1. **To Lift:** Stand at the foot of the bed. Grasp the mattress retainer strap or the edge of the mattress platform firmly. With a controlled motion, lift the platform upwards. The hydraulic pistons will engage and assist in raising the platform, holding it securely in the open position.
2. **To Lower:** Ensure the storage area is clear of obstructions and that no one is underneath the bed. Grasp the mattress retainer strap or the edge of the mattress platform. Gently pull the platform downwards. You may need to apply some downward force to overcome the hydraulic resistance initially. Guide the platform smoothly until it rests fully on the bed frame.

Image: A detailed view of the high-quality pneumatic lever, designed for smooth and easy lifting and lowering of the bed platform.

6. MAINTENANCE

- **Cleaning the Fabric:** For general cleaning, vacuum the upholstered fabric regularly using a soft

brush attachment. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner according to the product instructions, testing on an inconspicuous area first.

- **Frame Care:** Wipe the metal frame components with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability and prevent squeaking.
- **Hydraulic Mechanism:** The hydraulic pistons are designed for long-term use and generally require no maintenance. If you notice any issues with lifting or lowering, ensure no obstructions are present. Do not attempt to disassemble or repair the hydraulic pistons yourself.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Difficulty lifting/lowering the mattress platform.	Hydraulic pistons not fully engaged or too much weight on the platform.	Ensure the mattress is within the recommended weight range. Apply firm, even pressure when lifting/lowering. If the issue persists, contact customer support.
Bed frame is unstable or squeaks.	Loose hardware or uneven assembly.	Check and tighten all bolts and screws. Ensure the bed frame is on a level surface.
Mattress slides when platform is lifted.	Mattress retainer bar not installed or loose.	Verify the mattress retainer bar is correctly installed and securely fastened at the foot of the bed.
Parts missing or damaged.	Shipping damage or packaging error.	Do not proceed with assembly. Contact Novilla customer support immediately for replacement parts.

8. SPECIFICATIONS

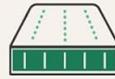

- **Model Number:** N-F12006-F-GR-New
- **Size:** Full
- **Product Dimensions:** 78.54"L x 57.48"W x 43.3"H
- **Color:** Grey
- **Material:** Wood, Metal, Fabric
- **Weight Capacity:** Up to 1000 pounds
- **Recommended Mattress Thickness:** 8-12 inches (no box spring needed)
- **Special Feature:** Tufted Fabric Headboard, Hydraulic Lift Storage
