## PRODUCT OVERVIEW

The Gloryes Dual Dash Cam features a compact design with intuitive controls for easy operation.

### Key Features:

- **Dual 2K/1440P Front & 1080P Interior Recording:** Captures high-resolution video of both the road ahead and the vehicle's interior.
- **Super Night Vision & WDR:** Enhanced low-light performance for clear recordings at night.
- **Loop Recording:** Automatically overwrites the oldest footage when the memory card is full.
- **Built-in G-Sensor:** Detects sudden impacts and automatically locks the current video file to prevent overwriting.
- **Parking Monitor:** When enabled, the dash cam will automatically start recording if it detects vibration or impact while the vehicle is parked. This feature requires a continuous power supply (e.g., via a hardwire kit, sold separately).
- **User-Friendly Design:** Buttons are conveniently located for easy access.

# Super Night Vision

Great Night Sensitivity with Sony Starvis Sensor

High-end  
Chip

F/1.8  
Aperture

WDR&HDR

4 IR Lights

## SETUP & INSTALLATION

Follow these steps to properly install your dash cam in your vehicle:

1. **Choose Mounting Location:** Select a location on your windshield that does not obstruct your view of the road. Ensure the front camera has a clear view.
2. **Clean Surface:** Clean the chosen area on the windshield thoroughly to ensure a strong adhesive bond or suction.
3. **Attach Mount:**
  - **Suction Cup Mount:** Press the suction cup firmly against the windshield and flip the lever to secure it.
  - **Adhesive Mount:** Peel off the protective film from the adhesive pad and firmly press the mount onto the windshield. Hold for 30 seconds.
4. **Attach Dash Cam:** Slide the dash cam onto the chosen mount until it clicks into place.
5. **Connect Power:**
  - Insert the charging cable into the dash cam's power port.
  - Route the cable neatly along the edge of the windshield and dashboard using the provided installation tool to tuck

it under trim panels.

- Plug the car charger into your vehicle's 12V power outlet (cigarette lighter socket).

6. **Insert SD Card:** Insert the provided 32GB SD card into the designated slot on the dash cam. Ensure it is inserted correctly until it clicks.
7. **Adjust Camera Angle:** Power on the dash cam and adjust the front and interior camera lenses to capture the desired viewing angles.

## OPERATING INSTRUCTIONS

---

### Power On/Off

- The dash cam will automatically power on and begin recording when your vehicle's engine starts.
- It will automatically power off when the engine is turned off.
- To manually power on/off, press and hold the power button.

### Recording Modes

- **Loop Recording:** Videos are recorded in continuous loops (e.g., 1, 3, or 5-minute segments). When the SD card is full, the oldest unlocked files are overwritten.
- **G-Sensor (Emergency Recording):** In the event of a sudden impact or collision, the G-sensor will automatically detect it and lock the current video file, preventing it from being overwritten by loop recording.
- **Parking Monitor:** When enabled, the dash cam will automatically start recording if it detects vibration or impact while your vehicle is parked. This feature requires a continuous power supply (e.g., via a hardwire kit, sold separately).

## G-Sensor

## Parking Monitor

# Parking Monitor 1s Recording

Image: The Parking Monitor feature in action, capturing events like a child playing with a ball or a potential intruder near the vehicle.

## Night Vision

The dash cam is equipped with Super Night Vision and Wide Dynamic Range (WDR) technology, along with 4 IR lights, to ensure clear video quality in low-light conditions, both for the front and interior cameras.

Your browser does not support the video tag.

Video: A demonstration of the dash cam's camera quality during day and night, for both front and rear cameras, including audio quality test.

## Video Playback & Download

You can review recorded videos directly on the dash cam's screen or transfer them to a computer.

- **On-Device Playback:** Use the navigation buttons on the dash cam to access the video playback menu.
- **SD Card Transfer:** Remove the SD card from the dash cam and insert it into a computer's card reader to access and transfer files.
- **USB Transfer:** Connect the dash cam directly to a computer using a USB cable to transfer files.

# Right Button, User-Friendly Design

Easy to operate buttons on the front when driving.

Other products have side and bottom buttons that are not easy to operate.

Image: Illustration of how to download recorded videos using either a USB connection or by directly transferring the SD card to a computer.

## MAINTENANCE

- **Format SD Card Regularly:** To ensure stable recording and prevent data corruption, it is recommended to format the SD card every 2-4 weeks.
- **Clean Lenses:** Use a soft, lint-free cloth to gently clean the camera lenses to maintain clear video quality.
- **Firmware Updates:** Check the official Gloryes website periodically for any available firmware updates to improve performance and add new features.
- **Operating Temperature:** Avoid exposing the dash cam to extreme temperatures for prolonged periods to prevent damage.

## TROUBLESHOOTING

Problem	Solution
---------	----------

Problem	Solution
Dash cam does not power on.	<ul style="list-style-type: none"> <li>◦ Ensure the car charger is properly connected to the 12V outlet and the vehicle's engine is running.</li> <li>◦ Check if the charging cable is securely plugged into the dash cam.</li> <li>◦ Test the 12V outlet with another device to confirm it's working.</li> </ul>
Video footage is blurry or unclear.	<ul style="list-style-type: none"> <li>◦ Clean the camera lenses with a soft cloth.</li> <li>◦ Ensure the protective film has been removed from the lenses.</li> <li>◦ Check if the dash cam is securely mounted and not vibrating.</li> </ul>
SD card error or recording stops.	<ul style="list-style-type: none"> <li>◦ Format the SD card within the dash cam's settings.</li> <li>◦ Ensure you are using a high-speed (Class 10 or U3) SD card.</li> <li>◦ Replace the SD card if the issue persists.</li> </ul>
Parking monitor not working.	<ul style="list-style-type: none"> <li>◦ Ensure the parking monitor feature is enabled in the settings.</li> <li>◦ Verify that the dash cam is receiving continuous power (e.g., via a hardwire kit) when the vehicle is off.</li> </ul>
