MAINTENANCE

Cleaning the Headset:

- Use a soft, dry cloth to wipe down the headset's exterior.
- The ear cushions are designed to be easy to remove and are resistant to alcohol and hypochlorous acid. For thorough cleaning, gently remove the ear cushions and wipe them with a suitable cleaning solution. Ensure they are completely dry before reattaching.
- Avoid using abrasive cleaners or solvents that may damage the headset's finish.

Storage:

- Store the headset in a cool, dry place away from direct sunlight and extreme temperatures.
- Avoid placing heavy objects on the headset to prevent damage.

TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|--|--|---|
| No audio from headset | Headset not properly connected. Volume too low or muted. Incorrect audio output device selected. | Ensure the USB Type-A connector is fully inserted into the port. Check the in-line volume control and mute buttons. Verify that the headset is selected as the default audio output device in your operating system's sound settings. |
| Microphone not working | Microphone muted. Incorrect audio input device selected. Microphone boom arm not positioned correctly. | Check the in-line microphone mute button. Verify that the headset microphone is selected as the default audio input device in your operating system's sound settings. Adjust the microphone boom arm closer to your mouth. |
| Virtual 7.1 surround sound not working | Feature not activated. Software/driver issue. | Ensure virtual 7.1 surround sound is enabled via the in-line control. Check for and install the latest drivers or software for your headset from the ASUS support website. |
