Lamicall STTP02

Lamicall 3-in-1 Flexible Phone Tripod Instruction Manual

Model: STTP02 | Brand: Lamicall

INTRODUCTION

Thank you for choosing the Lamicall 3-in-1 Flexible Phone Tripod. This versatile accessory is designed to enhance your photography and videography experience, offering stability and flexibility for a wide range of devices including smartphones, digital cameras, and GoPro. Its innovative design allows for easy setup in various environments, making it an essential tool for content creators, travelers, and everyday users.

PRODUCT COMPONENTS

Your Lamicall Tripod package includes the following:

- **Tripod Unit:** The main flexible tripod with integrated ball head.
- **Universal Phone Clip:** An expandable clip for securing smartphones.
- **GoPro Adapter:** For attaching GoPro cameras.
- **Wireless Bluetooth Remote:** For remote photo and video capture.

The Lamicall Flexible Phone Tripod comes with the main tripod unit, a universal phone clip, a GoPro adapter, and a wireless Bluetooth remote control for convenient operation.

SETUP

Attaching Your Device

The tripod is designed for broad compatibility:

- **Smartphones:** The universal phone clip expands to securely hold most smartphones (4-7 inches, 6.5-8.6 cm width). Simply pull the top jaw of the clip upwards and insert your phone.
- **Digital Cameras:** The tripod features a standard 1/4-inch screw on its ball head, allowing direct attachment of most small digital cameras.
- **GoPro:** Use the included GoPro adapter to mount your GoPro camera securely onto the tripod's 1/4-inch screw.

Wide Compatibility

Adapted to multiple
devices

The tripod features a standard 1/4-inch screw for direct attachment of small cameras. The included phone clip expands to securely hold smartphones from 4 to 7 inches. A dedicated adapter is provided for GoPro cameras.

Free Your Hands

Long distance record by
bluetooth remote

The tripod allows for hands-free operation, perfect for video recording or vlogging. The wireless remote control enables capturing photos and videos from a distance of up to 10 meters.

Pairing the Wireless Remote

The wireless Bluetooth remote allows for convenient remote control of your device's camera shutter.

1. Ensure the remote control has power.

2. Turn on Bluetooth on your smartphone.
3. Search for available Bluetooth devices and select "AB Shutter3" (or similar name) to pair.
4. Once paired, you can use the remote to trigger your phone's camera shutter for photos or start/stop video recording.

OPERATING INSTRUCTIONS

Adjusting the Flexible Legs

The tripod's legs are designed for maximum flexibility and stability:

- Each leg contains 8 twisted aluminum wires, allowing them to be bent and molded into various shapes.
- The outer silicone coating provides excellent anti-slip and shock-absorbing properties, ensuring stability on diverse surfaces.
- Wrap the legs around objects like railings, tree branches, or poles for unique perspectives and secure mounting.
- Adjust the legs to create a stable base on uneven terrain, rocks, or sand.

Perfect for Camera

Excellent stability photo tripod
for travel

Flexible arm for GoPro

Define its form as you wish

The tripod's flexible legs, reinforced with twisted aluminum wires and covered in non-slip silicone, can be bent and molded to adapt to various surfaces and objects, providing stable support even on uneven terrain.

Flexible & Durable

The highly flexible legs allow the tripod to be wrapped around poles, fences, tree branches, or other objects, enabling unique camera angles and stable shots in diverse environments.

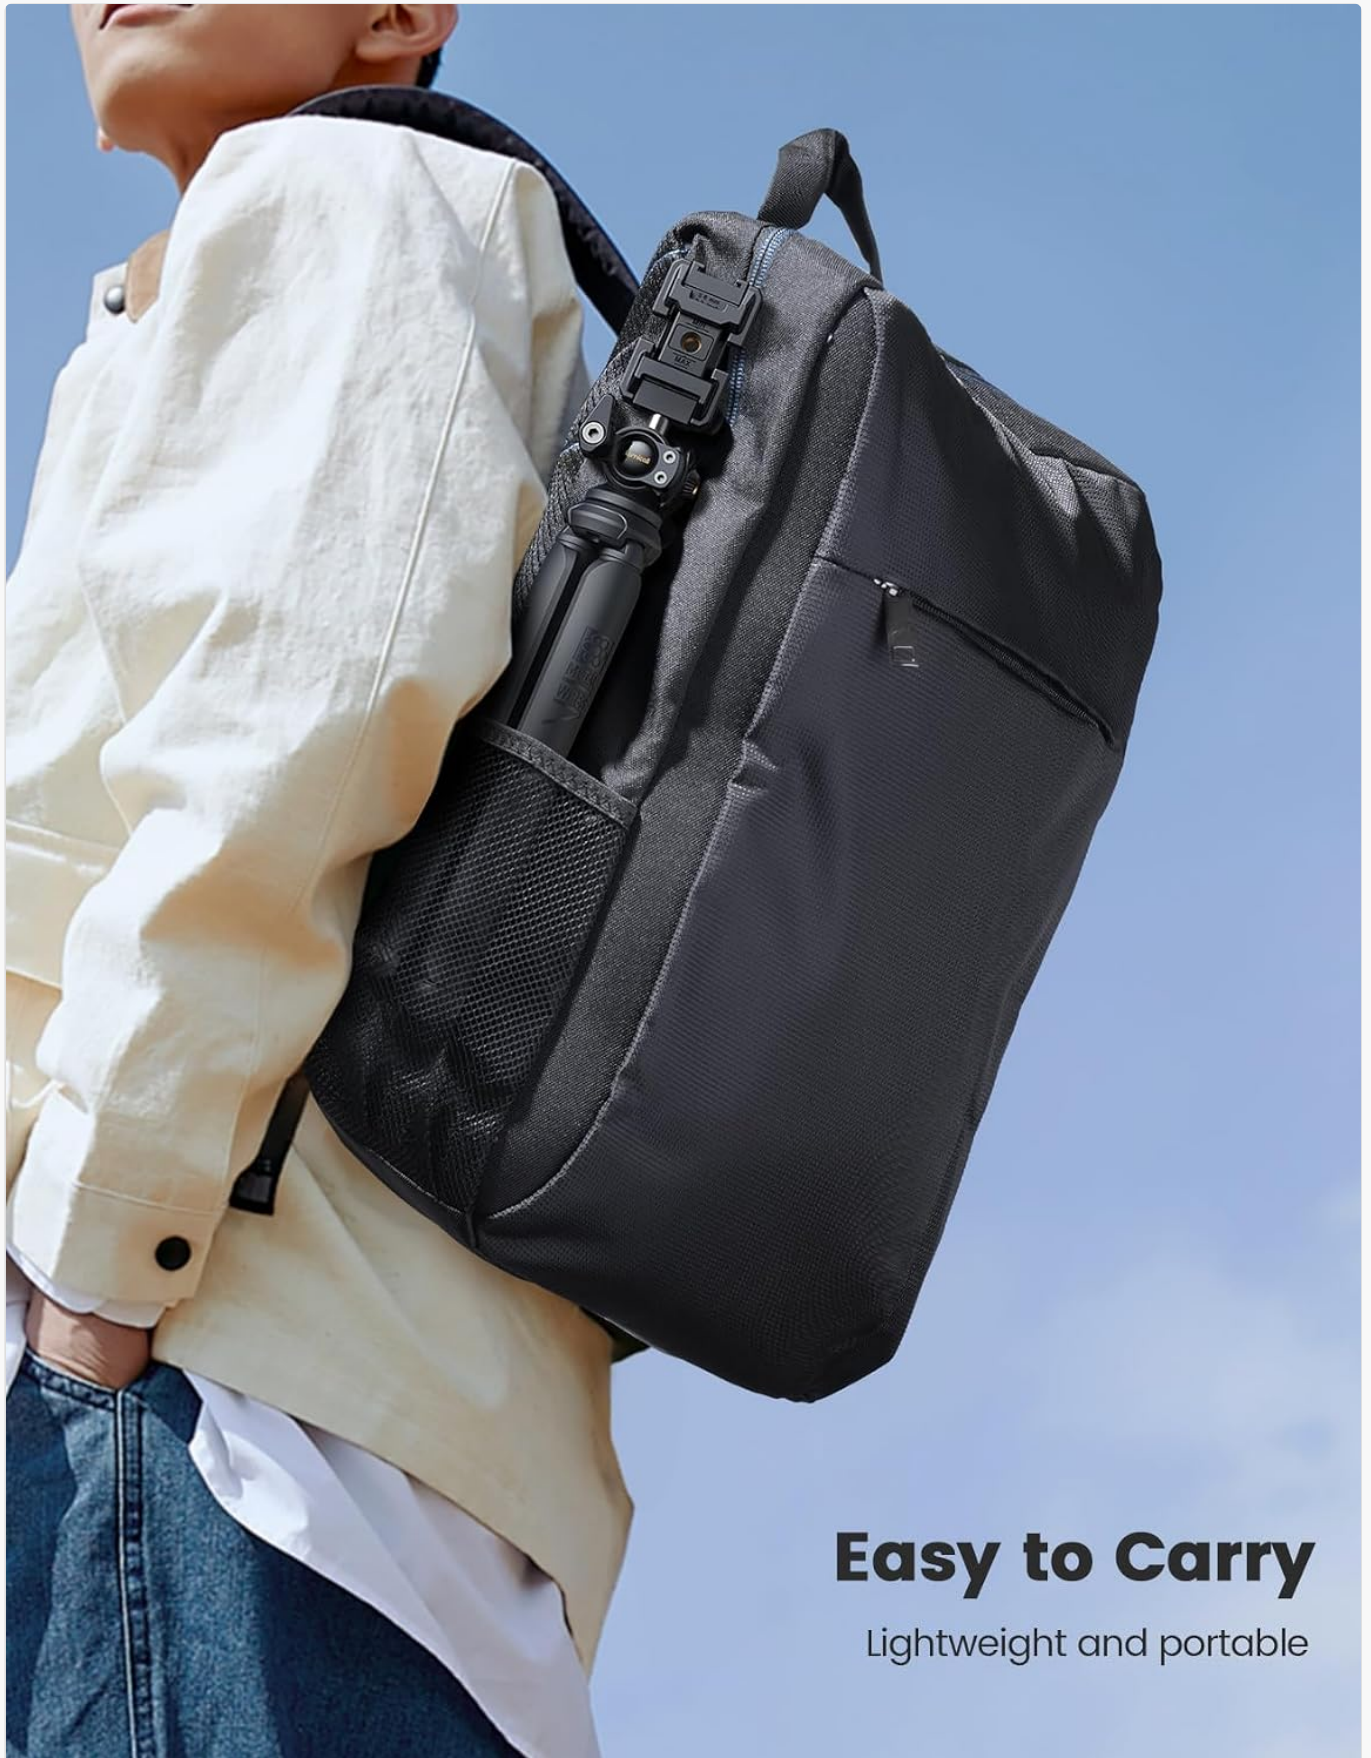

Adjusting Device Angle

The integrated ball head provides precise control over your device's angle:

- **360° Horizontal Rotation:** Easily rotate your device horizontally to capture panoramic shots or adjust framing

without repositioning the tripod.

- **135° Vertical Adjustment:** Tilt your device vertically to achieve desired upward or downward angles.
- **Securing the Angle:** Tighten the screw on the side of the ball head to lock your device firmly in place once the desired angle is set.

Easy to Carry

Lightweight and portable

The tripod head offers 360-degree horizontal rotation and 135-degree vertical adjustment, allowing you to capture shots in both horizontal and vertical modes from any desired angle. A side screw secures the device in place.

CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your Lamicall Tripod, please follow these care instructions:

- **Cleaning:** Wipe the tripod with a soft, damp cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, as they may damage the silicone and metal components.
- **Storage:** Store the tripod in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Over-Bending:** While the legs are flexible, avoid repeatedly bending them in the exact same spot to prevent material fatigue over time. Distribute the bends along the length of the legs.
- **Water Exposure:** The tripod is not waterproof. Avoid prolonged exposure to water or moisture.

TROUBLESHOOTING

Issue	Solution
Tripod unstable	Ensure legs are spread wide and evenly. Adjust leg bends for better grip on uneven surfaces.
Remote not pairing	Check remote battery. Ensure Bluetooth is enabled on your device. Forget and re-pair the device.
Phone not fitting	Ensure phone width is within 6.5-8.6 cm (4-7 inches). Remove bulky phone cases if necessary.
Device slips	Tighten the side screw on the tripod head. Ensure phone clip is fully extended and gripping securely.
