SETUP

1. Charging the Mouse

Before first use, it is recommended to fully charge the mouse. Connect the provided USB Type-C cable to the mouse and to a USB power source (e.g., computer USB port, wall adapter). The mouse features a Lithium Ion battery.

2. Connectivity Options

The Lamzu Atlantis Mini Pro supports dual-mode connectivity: 2.4G Wireless and Wired.

2.1. 2.4G Wireless Connection

1. Insert the USB dongle into an available USB port on your computer.

2. Ensure the mouse is powered on and in wireless mode.
3. The mouse should automatically connect to the dongle.

2.2. Wired Connection

Connect the provided USB Type-C cable directly from the mouse to your computer's USB port. The mouse will function in wired mode and charge simultaneously.

3. Software Installation (Optional but Recommended)

To customize DPI settings, button assignments, and other advanced features, download the official Lamzu software from the manufacturer's website. This software is also required for utilizing the maximum 4K Hz polling rate with a compatible 4K dongle (sold separately).

MAXIMUM 26000 DPI

The new generation Pixart sensor, is more responsive and can accurately track movement, making movement smoother and smoother.

*you can download driver from our website and set the DPI by own request

2. Grip Types

The Atlantis Mini Pro features an hourglass symmetrical design, providing a comfortable experience for various grip styles, especially for users with smaller hands. It is particularly well-suited for:

- **Claw Grip:** The wide back and curved top help prevent finger cramps.
- **Fingertip Grip:** Its lightweight and compact size offer flexibility.
- **Loose Palm Grip:** Provides support while maintaining agility.

MINI PRO SPECIFICATION

MAINTENANCE

1. Cleaning

To maintain optimal performance and hygiene, regularly clean your mouse. Use a soft, dry cloth to wipe the surface. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the mouse. Avoid abrasive cleaners or solvents.

2. Replacing PTFE Feet

The mouse comes with an extra set of PTFE feet. If the existing feet show signs of wear, affecting glide performance,

carefully peel off the old feet and apply the new ones in their place. Ensure the surface is clean before applying new feet for best adhesion.

TROUBLESHOOTING

1. Connectivity Issues

- Wireless:** Ensure the USB dongle is securely plugged into a working USB port. Check if the mouse is sufficiently charged. Try re-pairing the mouse with the dongle if applicable (refer to software instructions).
- Wired:** Ensure the USB Type-C cable is securely connected to both the mouse and the computer. Try a different USB port or cable.

2. DPI Not Changing

If your DPI settings are not responding, ensure the Lamzu software is installed and running. Verify that the settings are applied correctly within the software. Restarting the software or your computer may resolve the issue.

3. Unresponsive Buttons or Scroll Wheel

Check for any physical obstructions. Ensure the mouse firmware is up to date via the Lamzu software. If the issue persists, contact customer support.

4. Battery Life Concerns

Battery life can vary based on usage and polling rate. Ensure the mouse is fully charged. If battery life significantly degrades, contact customer support.
