# Instruction Manual for tectake® Clamp Awning

**Model:** 404963 | **Brand:** tectake

## INTRODUCTION

---

This manual provides detailed instructions for the assembly, operation, and maintenance of your tectake® Clamp Awning. Designed for balconies and terraces, this height-adjustable awning offers effective sun protection and privacy without the need for drilling. Its UV-resistant and water-repellent fabric ensures durability and comfort.

## SAFETY INFORMATION

---

**Warning:** Please read these instructions carefully before assembling and using the awning. Failure to follow these instructions may result in injury or damage to the product.

- Ensure the awning is securely fastened to the wall or ceiling to prevent slipping or falling.
- Use the awning only in suitable weather conditions. Retract the awning during strong winds, heavy rain, or snow to prevent damage.
- Ensure no objects or persons are under the awning when it is being extended or retracted.
- Keep children and pets away from the awning during operation.
- Do not hang heavy objects from the awning frame.

## PACKAGE CONTENTS

---

Please check that all components are present before beginning assembly:

- 1 x tectake® Clamp Awning
- Assembly Material (screws, caps, etc.)
- Assembly Instructions (this manual)

## SETUP

The tectake® Clamp Awning is designed for quick and easy assembly without the need for drilling. It features a practical clamping mechanism and telescopic poles for flexible height adjustment.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface. Verify all parts are present according to the package contents list.
2. **Assemble Frame:** Connect the robust, powder-coated steel frame components as per the diagrams in the assembly instructions. Ensure all connections are secure.
3. **Attach Awning Fabric:** Slide the awning fabric onto the designated aluminum waves. Ensure the fabric is

correctly oriented.

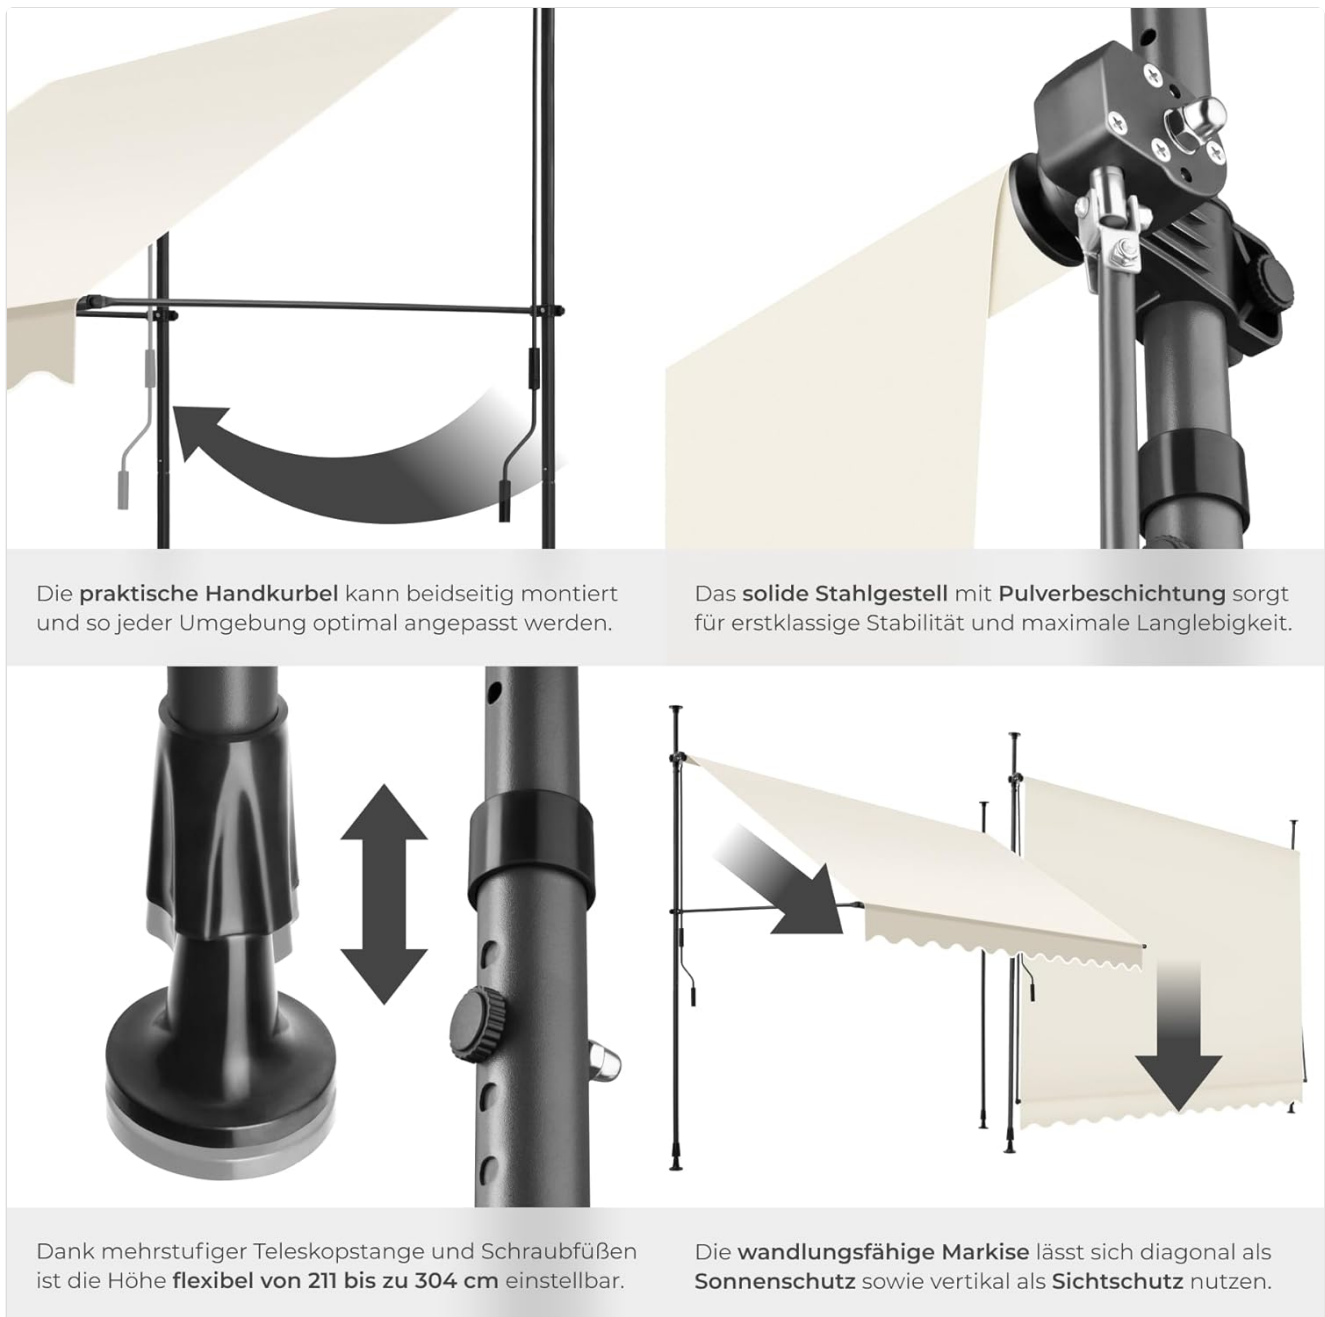

4. **Install Telescopic Poles:** Insert the telescopic poles into the main frame. Adjust the height of the poles to fit your balcony or patio space (adjustable from 211 cm to 304 cm). The non-slip, floor and ceiling protective plastic caps should be at the ends of the poles.
5. **Position and Clamp:** Place the assembled awning in the desired location. Extend the telescopic poles until they firmly clamp between the floor and ceiling/balcony overhang. Ensure the awning is stable and level.
6. **Mount Hand Crank:** The practical hand crank can be mounted on either side of the awning for optimal accessibility. Attach it securely to the designated mechanism.

## LEICHTER **Aufbau.**

Die praktische Klemmvorrichtung sorgt für eine besonders schnelle, sehr mühelose und äußerst variable Montage - ganz ohne Bohren & Dübeln.

*Image: Detailed views of the crank installation, height adjustment, and flexible positioning options.*

## OPERATING

Your tectake® Clamp Awning features a smooth-running crank mechanism for effortless extension and retraction.

- **Extending the Awning:** Turn the hand crank clockwise to extend the awning fabric to the desired length. The awning can be extended diagonally for sun protection or vertically for privacy.
- **Retracting the Awning:** Turn the hand crank counter-clockwise to retract the awning fabric. Ensure the fabric retracts smoothly and completely.
- **Adjusting Height:** The telescopic poles allow for height adjustment between 211 cm and 304 cm. Loosen the locking mechanism on the poles, adjust to the desired height, and then securely tighten the mechanism.
- **Adjusting Angle:** The awning's extension arms allow for flexible angle adjustment, from diagonal to completely vertical, to suit your sun protection or privacy needs.

## MAINTENANCE

---

Proper maintenance will extend the lifespan of your awning and ensure its continued performance.

- **Cleaning the Fabric:** The polyester fabric is water-repellent and easy to clean. Use a mild soap solution and a soft brush or cloth to clean the fabric. Rinse thoroughly with clean water and allow to air dry completely before retracting. Do not use harsh chemicals or abrasive cleaners.
- **Cleaning the Frame:** Wipe down the powder-coated steel and aluminum frame with a damp cloth to remove dust and dirt.
- **Lubrication:** Periodically check the crank mechanism and moving parts. Apply a silicone-based lubricant if necessary to ensure smooth operation.
- **Inspection:** Regularly inspect all screws, bolts, and connections to ensure they are tight and secure. Check the fabric for any tears or damage.
- **Winter Storage:** If storing the awning for an extended period, especially during winter, ensure it is clean and completely dry. Store in a dry, protected area to prevent damage from extreme weather conditions.

## TROUBLESHOOTING

If you encounter issues with your tectake® Clamp Awning, please refer to the following common solutions:

| Problem                                  | Possible Cause                                              | Solution                                                                                                                      |
|------------------------------------------|-------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Awning does not extend/retract smoothly. | Mechanism is dry or obstructed.                             | Clean the mechanism and apply a silicone-based lubricant. Check for any obstructions.                                         |
| Awning feels unstable after setup.       | Telescopic poles not securely clamped or unevenly adjusted. | Ensure poles are extended to maximum tension and are level. Check that the plastic caps are firmly in place and not slipping. |
| Fabric sags or is uneven.                | Fabric not properly aligned on the rollers or frame.        | Retract the awning completely and then re-extend it slowly, guiding the fabric to ensure even tension.                        |

| Problem                                       | Possible Cause                           | Solution                                                        |
|-----------------------------------------------|------------------------------------------|-----------------------------------------------------------------|
| Awning makes unusual noises during operation. | Lack of lubrication or loose components. | Lubricate moving parts. Check and tighten all screws and bolts. |
