2. Car Charging

1. The Dino RC car has a built-in 500mAh lithium battery.
2. Locate the charging port on the side of the car.
3. Connect the included USB charging cable to the car's charging port and plug the other end into a USB power source (e.g., computer, wall adapter).
4. The charging indicator light on the car will turn red during charging and turn off when fully charged.

Newly Upgraded Rechargeable RC Car

The light turns red when charging the car and goes out when fully charged.

MAINTENANCE

- Wipe the car and remote control with a clean, damp cloth to remove dust and dirt.
- Do not immerse the toy in water.
- Store the toy in a cool, dry place away from direct sunlight when not in use.
- Remove batteries from the remote control if storing for extended periods to prevent leakage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Car does not move or respond to remote.	Low battery in car or remote; Car power switch is off.	Charge the car's battery. Replace AA batteries in the remote. Ensure the car's power switch is ON.
Lights or sounds are not working.	Low battery in car; Sound/Music button not pressed.	Charge the car's battery. Press the Sound/Music button on the remote.
Remote control not pairing with car.	Interference; Remote too far from car.	Ensure no other RC devices are nearby. Bring the remote closer to the car.
