VRURC T2066

VRURC 20000mAh Portable Phone Charger (Model T2066) Instruction Manual

Brand: VRURC

INTRODUCTION

Thank you for choosing the VRURC 20000mAh Portable Phone Charger, Model T2066. This power bank is designed for convenience and efficiency, featuring multiple built-in cables and fast-charging capabilities to keep your devices powered on the go. Please read this manual carefully to ensure proper use and maintenance of your device.

PRODUCT OVERVIEW

The VRURC T2066 portable charger is equipped with a high-capacity 20000mAh lithium polymer battery, offering fast charging at QC4.0 22.5W/PD 20W. It features three output cables (USB-C, Lightning, Micro-USB) and one input cable (USB-A for recharging the power bank), along with additional USB-C input/output and USB-A output ports.

SETUP

Initial Charging of the Power Bank

Before first use, fully charge your VRURC power bank. The smart LED display will show the remaining power percentage, ensuring you know when it's ready.

- 1. Using Built-in USB-C Cable (18W):** Connect the built-in USB-C cable to a compatible 18W power adapter. Full recharge takes approximately 5.5 hours.

2. **Using USB-C Input (QC/PD 3.0, 18W):** Connect a USB-C to USB-C cable (not included) from an 18W QC/PD 3.0 compatible power adapter to the power bank's USB-C input port. Full recharge takes approximately 5.5 hours.
3. **Using Built-in USB-A Cable (10W):** Connect the built-in USB-A cable to a standard 10W USB power adapter. Full recharge takes approximately 11 hours.

Image: Demonstrates the three convenient ways to recharge the power bank: via built-in USB-C, external USB-C input, and built-in USB-A cable, with corresponding charging times.

Unboxing the Product

OPERATING INSTRUCTIONS

Charging Your Devices

The VRURC T2066 allows you to charge up to four devices simultaneously using its built-in cables and additional ports.

- **Built-in Cables:**

- **USB-C Output:** Compatible with iPhone 15 series, Samsung Galaxy S23/S22/S21, iPad, Google Pixel, and other USB-C devices.
- **Lightning Output:** Compatible with iPhone 14/13/12/11 series and earlier models.
- **Micro-USB Output:** Compatible with older Android phones, smartwatches, headphones, and other Micro-USB devices.

- **Additional Ports:**

- **USB-A Output:** Use with your own USB-A charging cable for various devices.
- **USB-C Output:** Use with your own USB-C charging cable for various devices.

To begin charging, simply pull out the appropriate built-in cable or connect your own cable to an available port, then plug it into your device. The power bank will automatically detect and begin charging.

Fast Charging Feature

The power bank supports QC4.0 22.5W and PD 20W fast charging, allowing you to charge compatible devices up to 60% in 30 minutes.

Image: An infographic illustrating the speed of PD 20W fast charging, showing a device reaching 50% charge significantly faster than with standard 10W charging.

LED Display

The integrated LED display accurately shows the remaining power percentage of the power bank, from 0% to 100%.

MAINTENANCE

- Keep the power bank away from extreme temperatures, direct sunlight, and liquids.
- Avoid dropping or subjecting the device to strong impacts.
- Clean the exterior with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Store in a cool, dry place when not in use for extended periods.

TROUBLESHOOTING

- **Device not charging:**
 - Ensure the power bank is sufficiently charged (check LED display).
 - Verify that the charging cable is securely connected to both the power bank and your device.
 - Try a different built-in cable or an external cable with the USB-A/USB-C output ports.
 - Confirm your device is compatible with the power bank's output specifications.
- **Power bank not recharging:**
 - Ensure the input cable (built-in USB-A or external USB-C) is properly connected to a working power source.
 - Try a different power adapter or wall outlet.
 - Check if the input cable is damaged.
- **Slow charging:**
 - Ensure your device supports fast charging and that you are using a compatible cable and port.
 - Charging multiple devices simultaneously may reduce individual charging speeds.

SPECIFICATIONS

Model Name	T2066
Brand	VRURC
Battery Capacity	20000 Milliamp Hours
Battery Cell Type	Lithium Polymer
Fast Charging Performance	QC4.0 22.5W / PD 20W (60% in 0.5 Hour)

Recharge Time	5.5 Hours (18W USB-C) / 11 Hours (10W USB-A)
