SteFik M6 Pro

SteFik Robot Vacuum Replacement Parts Kit for Proscenic M6 Pro Instruction Manual

Introduction

This instruction manual provides detailed guidance for the installation and maintenance of your SteFik replacement parts kit, designed for the Proscenic M6 Pro Robot Vacuum Cleaner. Regular replacement of these components ensures your robot vacuum maintains optimal cleaning performance and extends its lifespan.

Product Overview

The SteFik replacement parts kit includes essential components for your Proscenic M6 Pro robot vacuum. Please verify that all parts listed below are present in your package.

Image: A complete set of replacement parts, including main brush, side brushes, HEPA filters, and mop cloths.

- **Main Brush:** Essential for deep cleaning carpets and hard floors.
- **Side Brushes:** Designed to sweep debris from edges and corners into the cleaning path.
- **HEPA Filters:** Captures fine dust particles and allergens, improving air quality.
- **Mop Cloths:** For wet cleaning and polishing hard floors.
- **Main Brush Cover:** Protects the main brush and ensures proper operation.

Installation Guide

Before installing any replacement parts, ensure your Proscenic M6 Pro robot vacuum is powered off and disconnected from its charging base.

1. Replacing the Main Brush and Main Brush Cover

1. Turn the robot vacuum upside down.
2. Locate the main brush cover. Press the release tabs on both sides to remove the old cover.

Image: The main brush cover, which secures the main brush in place.

3. Lift out the old main brush.

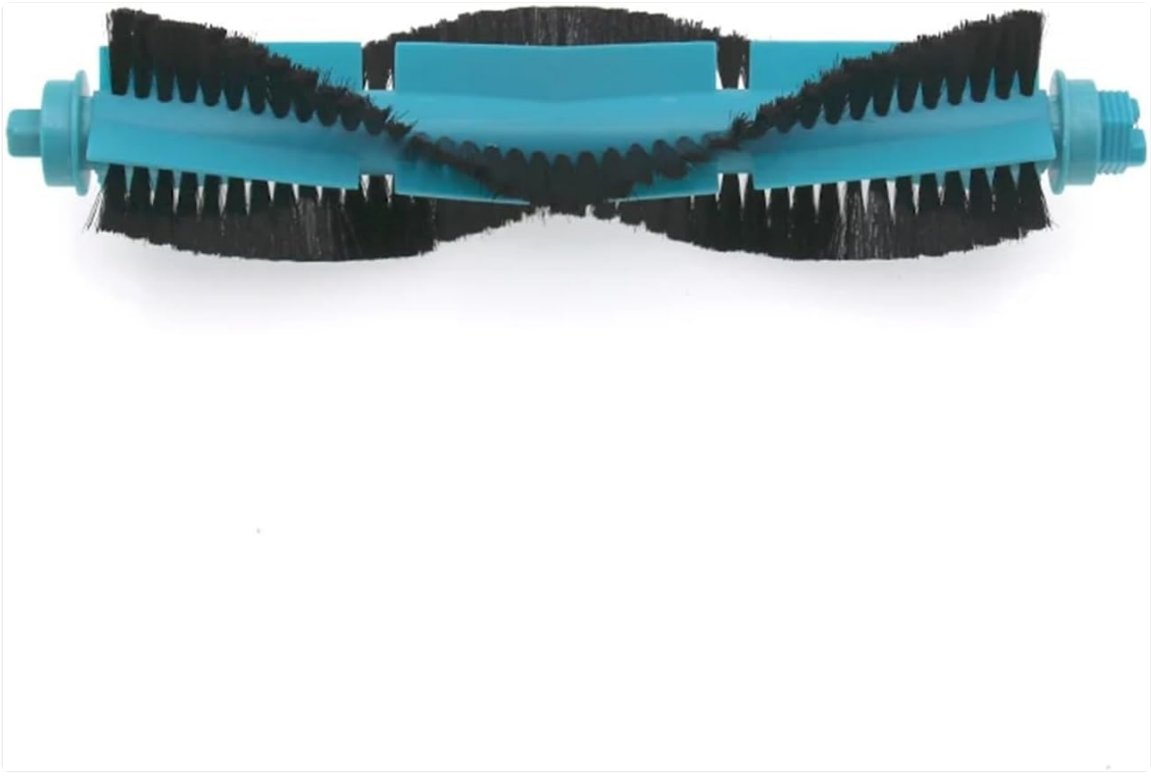

Image: The main roller brush, typically blue and black, used for sweeping debris.

4. Insert the new main brush into its slot, ensuring the ends align correctly with the vacuum's mechanism.
5. Place the new main brush cover back into position and press down until it clicks securely into place.

2. Replacing Side Brushes

1. Turn the robot vacuum upside down.
2. Locate the side brushes. Depending on your model, they may be secured by a screw or simply snap into place.

Image: A three-armed side brush, typically black with grey bristles, designed to sweep edges.

3. If screwed, use a screwdriver to remove the screw. Gently pull the old side brush upwards to remove it.
4. Align the new side brush with the post and push it down until it snaps into place or secure it with the screw.

3. Replacing HEPA Filters

1. Open the dustbin cover on your robot vacuum and remove the dustbin.
2. Locate the filter compartment within the dustbin.
3. Remove the old HEPA filter by pulling it out.

Image: A rectangular white HEPA filter with a plastic frame, designed to capture fine particles.

4. Insert the new HEPA filter into the compartment, ensuring it fits snugly.
5. Close the filter compartment and reinsert the dustbin into the robot vacuum.

4. Replacing Mop Cloths

1. Remove the water tank or mopping module from the robot vacuum.
2. Detach the old mop cloth from the module, typically via Velcro or a sliding mechanism.

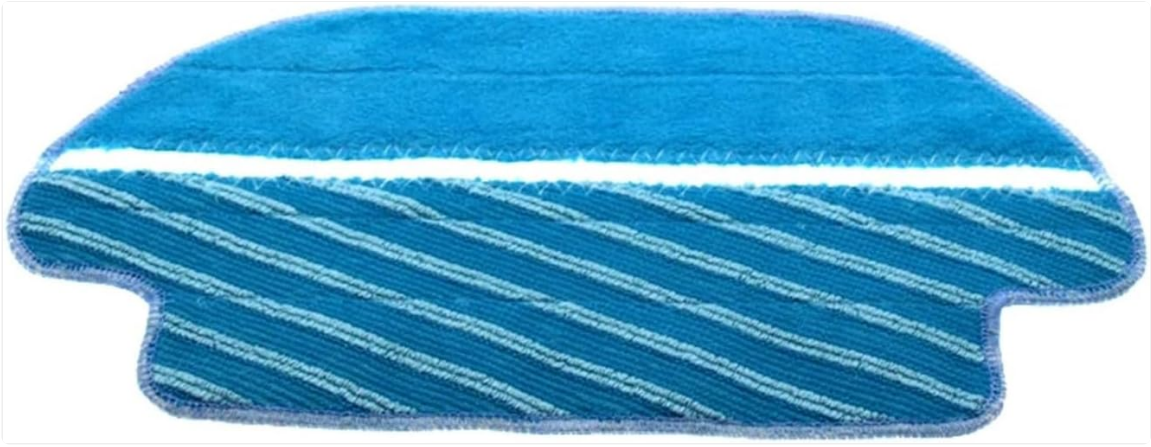

Image: A blue mop cloth with white striped patterns, used for wet cleaning.

3. Attach the new mop cloth to the water tank or mopping module, ensuring it is securely fastened.
4. Reinstall the water tank or mopping module onto the robot vacuum.

Operating Considerations

After replacing any parts, ensure they are correctly installed before operating your Proscenic M6 Pro robot vacuum. Incorrect installation can affect cleaning performance or damage the device. Always refer to your robot vacuum's original user manual for specific operating instructions.

Maintenance

Regular maintenance of your replacement parts will prolong their effectiveness and the overall performance of your robot vacuum.

- **Main Brush:** Clean regularly by removing hair and debris tangled around the brush and its ends. Use the cleaning tool provided with your vacuum, if available.
- **Side Brushes:** Check for tangled hair or debris. If bristles are bent or damaged, consider replacing them.
- **HEPA Filters:** Tap the filter gently over a trash can to remove accumulated dust. Do not wash HEPA filters with water unless explicitly stated by the manufacturer, as this can damage the filter material. Replace filters every 1-3 months depending on usage.
- **Mop Cloths:** After each use, remove and wash the mop cloth thoroughly with water. Allow it to air dry completely before reattaching.

Troubleshooting

If you encounter issues after replacing parts, consider the following:

- **Reduced Cleaning Performance:** Ensure the main brush and side brushes are free of tangles and correctly installed. Check if the HEPA filter is clogged and needs cleaning or replacement.
- **Unusual Noises:** Verify that the main brush and side brushes are installed correctly and not

obstructed by foreign objects.

- **Water Leakage (Mop Cloth):** Ensure the mop cloth is properly attached to the water tank/module and that the water tank itself is correctly seated.

For issues not related to the replacement parts, please consult your Proscenic M6 Pro robot vacuum's original user manual or contact Proscenic customer support.

Specifications

Brand	SteFik
Compatible Model	Proscenic M6 Pro Robot Vacuum Cleaner
Material (Filter)	HEPA
Reusability (Mop Cloths)	Reusable
