SteFik M6 Pro

SteFik Replacement Parts Kit for Proscenic M6 Pro Robot Vacuum Cleaner

User Manual

Introduction

This manual provides instructions for the installation, maintenance, and replacement of the SteFik Replacement Parts Kit for the Proscenic M6 Pro Robot Vacuum Cleaner. This kit includes essential components designed to maintain the optimal performance of your robot vacuum.

Safety Guidelines

- Always power off and unplug your robot vacuum cleaner before attempting any installation, removal, or maintenance of parts.
- Keep small parts away from children to prevent choking hazards.
- Use only genuine or compatible replacement parts to ensure proper function and avoid damage to your device.
- Handle brushes and filters carefully to avoid injury or damage to the components.

Package Contents

The SteFik Replacement Parts Kit (4 Filter variant) typically includes the following items:

- 1 x Main Roller Brush
- 4 x Side Brushes
- 4 x HEPA Filters
- 4 x Mop Cloths
- 1 x Main Brush Cover

Installation Instructions

Ensure the robot vacuum is powered off and unplugged before proceeding with any installation.

1. Main Roller Brush Installation

1. Turn the robot vacuum cleaner upside down.
2. Locate the main brush cover, usually secured by two tabs or screws.
3. Press the release tabs or unscrew to remove the main brush cover.
4. Lift out the old main roller brush.
5. Insert the new main roller brush into its slot, ensuring the ends align with the corresponding openings.
6. Replace the main brush cover and secure it.

Image: The main roller brush, featuring a teal core and black bristles, designed for efficient floor cleaning.

2. Side Brush Installation

1. Turn the robot vacuum cleaner upside down.
2. Locate the side brushes. They are typically held in place by a single screw.
3. Use a screwdriver to remove the screw holding the old side brush.
4. Remove the old side brush.
5. Align the new side brush with the post and press it down.
6. Secure the new side brush with the screw.

3. HEPA Filter Installation

1. Open the dustbin compartment of your robot vacuum.
2. Remove the dustbin.
3. Locate the filter assembly within the dustbin.
4. Remove the old HEPA filter by pulling it out.
5. Insert the new HEPA filter into the designated slot, ensuring it is seated correctly.
6. Close the dustbin and reinsert it into the vacuum.

4. Mop Cloth Installation

1. Locate the mop cloth attachment or water tank on your robot vacuum.
2. Remove the old mop cloth, typically attached with Velcro or by sliding it into grooves.
3. Attach the new mop cloth, ensuring it is securely fastened and covers the designated area.
4. If applicable, fill the water tank before reattaching the mop module to the vacuum.

5. Main Brush Cover Installation

1. After installing the main roller brush, position the new main brush cover over the brush compartment.
2. Align the tabs or screw holes.
3. Press down firmly until the tabs click into place, or secure with screws if applicable.

Maintenance and Care

Regular maintenance of your replacement parts ensures optimal cleaning performance and extends the lifespan of your robot vacuum.

Main Roller Brush

- **Cleaning Frequency:** Inspect weekly, clean every 1-2 weeks depending on usage.
- **Procedure:** Remove the main brush. Use the cleaning tool (often included with the vacuum) or scissors to cut and remove hair and debris tangled around the brush and its bearings. Wipe the brush with a dry cloth.

Side Brushes

- **Cleaning Frequency:** Inspect weekly, clean every 2-4 weeks.
- **Procedure:** Remove the side brushes. Untangle any hair or debris. If bristles are bent, you can soak them in warm water for a few minutes to help them regain their shape. Ensure they are completely dry before reattaching.

HEPA Filters

- **Cleaning Frequency:** Tap clean weekly, replace every 2-3 months.
- **Procedure:** Remove the filter from the dustbin. Gently tap the filter against a trash can to dislodge dust and debris.**Do not wash HEPA filters with water** unless explicitly stated by the vacuum manufacturer, as this can damage the filter material.

Mop Cloths

- **Cleaning Frequency:** Wash after each mopping session.
- **Procedure:** Remove the mop cloth. Hand wash with mild detergent and warm water, or machine wash on a gentle cycle. Air dry completely before reattaching to prevent mildew and odors.

Troubleshooting Common Issues

- **Brushes not spinning or making unusual noise:** Check for tangled hair or debris around the brush and its bearings. Ensure the brushes are installed correctly and securely.
- **Reduced suction or poor cleaning performance:** The HEPA filter might be clogged. Clean or replace the filter. Ensure the dustbin is empty and properly seated.
- **Mop cloth not effectively cleaning:** Ensure the mop cloth is clean and properly attached. Check if the water tank (if applicable) is filled and dispensing water correctly.
- **Parts do not fit:** Double-check that you have the correct replacement parts for the Proscenic M6 Pro model. Ensure parts are oriented correctly during installation.

Product Specifications

Component	Quantity (4 Filter Kit)	Material
Main Roller Brush	1	Plastic, Bristles
Side Brushes	4	Plastic, Nylon Bristles
HEPA Filters	4	Filter Paper, Plastic Frame
Mop Cloths	4	Microfiber Fabric
Main Brush Cover	1	Plastic
