Problem	Possible Cause	Solution
Desk is wobbly	Loose fasteners; uneven floor.	Ensure all screws are fully tightened. Adjust leveling feet if present, or place shims under legs on uneven surfaces.
Missing parts during assembly	Packaging error.	Review the package contents list. Contact ODK customer service with the specific part number(s) needed.
Difficulty aligning holes during assembly	Parts are not correctly oriented; screws overtightened prematurely.	Ensure all parts are facing the correct direction as per diagrams. Loosen all screws slightly, align parts, then tighten gradually.
