5. TROUBLESHOOTING

If you encounter issues with your monitor, please refer to the following common troubleshooting steps:

- **No Signal:** Ensure all cables (USB-C, HDMI) are securely connected to both the monitor and your source device. Verify the correct input source is selected via the OSD menu.
- **Touchscreen Not Responding:** Confirm your source device supports touch input over the connected port (USB-C is usually required). Ensure the monitor is not in Portrait Mode if using touch. Reconnect the USB-C cable.
- **Screen Flickering:** This can sometimes occur with Type-C display output if insufficient power is supplied. Ensure the monitor is receiving adequate power, potentially by plugging in the included PD Power Adapter.
