## SETUP AND ASSEMBLY

---

Follow these steps to assemble your vanity desk. It is recommended to have a second person for certain steps to ensure stability and ease of assembly. Tools required are typically included or standard household tools.

### Step 1: Assemble the Main Frame

Begin by connecting the metal frame components as shown in the assembly video. Ensure all screws are

tightened securely but do not overtighten until all parts are aligned.

## OPERATING INSTRUCTIONS

---

### Using the Flip-Top Mirror

Gently lift the top surface of the desk to reveal the mirror and internal storage compartments. The secure metal hinge allows for smooth and controlled opening and closing. When closed, the surface can be used as a regular desk, providing a versatile workspace.

### Organizing Storage

Utilize the two open shelves above the desk surface for displaying decorative items or frequently accessed essentials. The four internal compartments beneath the flip-top mirror are ideal for organizing cosmetics, makeup tools, jewelry, and other personal items, keeping them tidy and easily accessible.

## MAINTENANCE

---

### Cleaning

To clean the surfaces of the vanity desk and stool, wipe them with a dry, soft cloth. For spills, use a slightly damp cloth and dry immediately. Avoid using abrasive cleaners, harsh chemicals, or excessive moisture, as

these can damage the finish.

## General Care

Periodically check all screws and connections to ensure they remain tight. Retighten if necessary to maintain the stability and structural integrity of the furniture. Avoid placing hot items directly on the surface; use coasters or protective pads.

## TROUBLESHOOTING

---

### Instability

If the desk feels unstable, first ensure the anti-toppling device is correctly installed and securely fastened to the wall. Next, verify that all assembly screws are tightened. Adjust the foot pads on the stool for optimal balance on uneven flooring.

### Mirror Hinge Issues

If the flip-top mirror hinge is stiff or difficult to operate, apply a small amount of silicone lubricant to the moving parts. Do not force the hinge, as this may cause damage. If issues persist, contact customer support.
