6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Chair feels wobbly or unstable.	Loose screws or uneven surface.	Ensure all screws are tightened. Move chair to a flat, level surface.
Backrest does not lock into position.	Not fully engaged in the notch.	Lift and reposition the backrest, ensuring it clicks securely into one of the three adjustment notches.
Chair is difficult to fold.	Mechanism stiff or obstruction.	Ensure no objects are obstructing the folding mechanism. Apply gentle, even pressure. If stiff, check for debris in joints.
Squeaking noises during use.	Loose joints or friction.	Tighten all screws. A small amount of silicone spray on pivot points (avoiding cushion) may help.
