## Safety Information

---

### Important Safety Instructions:

- Installation must be performed by a qualified professional plumber in accordance with all local plumbing and building codes.
- Ensure the floor can support the weight of the bathtub when filled with water and a person.
- Always test water temperature before entering the bathtub to prevent scalding.
- Do not use abrasive cleaners or harsh chemicals on the bathtub surface, as this may damage the acrylic finish.
- Keep children supervised when near the bathtub.
- Avoid standing in the bathtub when filling or draining to prevent slipping.

## Package Contents

---

Verify that all components are present before beginning installation. The package typically includes:

- Freestanding Acrylic Bathtub
- Pre-installed Slotted Overflow

- Pre-installed Pop-up Drain (Polished Chrome finish)
- Adjustable Leveling Feet
- Installation Hardware (as required for drain connection)
- User Manual (this document)

## Setup and Installation

---

Proper installation is crucial for the performance and safety of your freestanding bathtub. Refer to the detailed instructions provided in the physical user manual included with your product for specific steps. Below are general guidelines:

1. **Preparation:** Ensure the installation area is clean, level, and has adequate plumbing connections (drain and water supply).
2. **Positioning:** Carefully place the bathtub in its desired location. The freestanding design allows for flexible placement within your bathroom.
3. **Leveling:** Adjust the leveling feet at the bottom of the tub to ensure it is perfectly stable and level on the floor.
4. **Drain Connection:** Connect the bathtub's pop-up drain and overflow system to your floor drain. Ensure all connections are watertight and sealed according to plumbing standards.
5. **Testing:** Fill the tub with water and check for any leaks around the drain and overflow connections before final sealing or finishing.

## Operating Instructions

Your Vanity Art freestanding bathtub is designed for a comfortable soaking experience.

- **Filling the Bathtub:** Ensure the pop-up drain is closed. Fill the tub with water to your desired level, being mindful of the overflow limit.
- **Soaking:** The ergonomic design provides excellent lumbar support for relaxation.
- **Draining the Bathtub:** Press the pop-up drain to open it and allow the water to drain completely.

## Maintenance and Care

To maintain the pristine condition of your acrylic bathtub, follow these care instructions:

- **Regular Cleaning:** Clean the tub regularly with a soft cloth or sponge and a non-abrasive, mild liquid cleaner. Rinse thoroughly with clean water after cleaning.
- **Avoid Harsh Chemicals:** Do not use abrasive powders, scouring pads, steel wool, or cleaners containing ammonia, acetone, or strong acids, as these can damage the acrylic surface and finish.
- **Stain Removal:** For stubborn stains, use a diluted solution of white vinegar and water, or a specialized acrylic cleaner.

- **Prevent Scratches:** Avoid dropping sharp or heavy objects into the tub. The acrylic material is designed to be stain and scratch-resistant, but proper care extends its lifespan.
- **Drain Maintenance:** Periodically remove and clean the pop-up drain to prevent clogs from hair and soap residue.

## Troubleshooting

If you encounter issues with your bathtub, refer to the following common solutions:

Problem	Possible Cause	Solution
Slow Drainage	Hair or debris in the drain.	Remove and clean the pop-up drain mechanism. Use a drain snake if necessary.
Water Leaks Around Drain	Improperly sealed drain connection.	Tighten drain connections. Apply plumber's putty or silicone sealant as needed. Consult a professional plumber if the issue persists.
Bathtub is Unstable/Wobbles	Uneven floor or improperly adjusted leveling feet.	Adjust the leveling feet at the base of the tub until it is stable. Ensure the floor surface is even.
