- **Defrost Function:** Use this function for toasting frozen bread. Insert frozen bread, select your desired browning level, then press the 'Defrost' button before pressing the high-lift lever down. The toaster will automatically adjust the toasting time to account for the frozen bread.
- **Reheat Function:** Use this function to warm up previously toasted bread without further browning. Insert the toast, press the 'Reheat' button, then press the high-lift lever down. This cycle is shorter and uses lower heat.

4.3 Using the Warming Rack

1. Gently push the warming rack levers on the sides of the toaster upwards to deploy the rack.
2. Place the items to be warmed on the rack.
3. Set the browning control to a low setting (e.g., 1 or 2).

1. Always unplug the toaster from the power outlet and allow it to cool completely before cleaning.

2. **Cleaning the Crumb Tray:** Pull out the removable crumb tray located at the bottom of the toaster. Discard crumbs and wipe the tray clean with a damp cloth. Dry thoroughly before reinserting. Clean the crumb tray regularly to prevent crumb buildup, which can be a fire hazard.
3. **Cleaning the Exterior:** Wipe the exterior of the toaster with a soft, damp cloth. Do not use abrasive cleaners or metal scouring pads, as these can scratch the surface.
4. **Cleaning the Interior:** Do not insert any objects into the toasting slots to clean them. If food becomes lodged, unplug the toaster and carefully turn it upside down to shake out the food.
5. **Storage:** When not in use, the power cord can be wrapped around the cord storage area at the bottom of the toaster for neat storage. Store the toaster in a dry, clean place.
