

## Tribesigns XK00312/313

# Tribesigns Tall Shoe Cabinet

## INSTRUCTION MANUAL - MODEL XK00312/313

### Introduction

---

Thank you for choosing the Tribesigns Tall Shoe Cabinet. This manual provides detailed instructions for the assembly, operation, and maintenance of your new shoe cabinet. Please read this manual thoroughly before beginning assembly to ensure proper setup and long-lasting use of your product. Keep this manual for future reference.

### Important Safety Information

---

**WARNING: Always assemble this product with two people. Do not overload shelves; maximum weight capacity is 99 pounds. Ensure the cabinet is stable and level before use.**

### Setup and Assembly

---

The Tribesigns Tall Shoe Cabinet is designed for straightforward assembly. All necessary tools and assembly guides are included with your product. We recommend two individuals for assembly due to the cabinet's height and size to ensure safety and ease of construction.

- Unpack all components and verify against the parts list in the included assembly guide.
- Ensure you have ample space for assembly.
- Follow the step-by-step instructions provided in the separate assembly guide for proper construction.
- Utilize the included anti-tipping kits to secure the cabinet to a wall, preventing accidental tipping, especially in households with children or pets.

62.99"

70.86"

The blue board is movable and can be taken off freely. The red one is a structural board and cannot be moved.

## Operating Your Shoe Cabinet

The Tribesigns Tall Shoe Cabinet offers versatile storage for your footwear collection. With 9 tiers, it can comfortably hold 32-35 pairs of adult shoes or 40-45 pairs of kids' shoes. The open design allows for easy access and visual organization of your shoes.

- Utilize the multiple tiers to categorize and organize your shoes by type, season, or frequency of use.
- The movable shelves provide flexibility to accommodate taller items like boots. Simply adjust the shelf height as needed.
- For maximum stability, distribute weight evenly across the shelves.

## Maintenance and Care

---

To ensure the longevity and appearance of your Tribesigns Tall Shoe Cabinet, follow these simple maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish. The smooth veneer surface is designed for easy cleaning.
- **Stability:** Periodically check all screws and connections to ensure they remain tight. The non-slip feet pads help maintain stability and protect your floors.
- **Weight Distribution:** Always distribute the weight of your shoes and other items evenly across the shelves to prevent warping or damage. Do not exceed the 99-pound weight limit.

## Troubleshooting

If you encounter any issues during assembly or use, please refer to the following common solutions:

| Problem                    | Possible Cause                                          | Solution                                                                                                                                                                                                     |
|----------------------------|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Difficulty during assembly | Incorrect part orientation or misaligned holes.         | Double-check the assembly guide for correct orientation of parts. If a screw or cam lock is not fitting, try another piece from the extras provided. Ensure all connections are firm but do not overtighten. |
| Cabinet feels unstable     | Uneven floor surface or anti-tipping kit not installed. | Ensure the cabinet is placed on a flat, level surface. Install the anti-tipping kit securely to a wall as per the assembly instructions. Distribute items evenly on shelves.                                 |

| Problem                       | Possible Cause                                | Solution                                                                                                                                      |
|-------------------------------|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Insufficient storage capacity | Number of shoes exceeds recommended capacity. | Consider purchasing an additional unit for more storage, as two units can be placed together. Utilize adjustable shelves for taller footwear. |
