OVE Decors 15SGP-BELS60-SATWM

OVE Decors Bel Frameless Sliding Shower Door Instruction Manual

Model: 15SGP-BELS60-SATWM | Finish: Satin Nickel

1. INTRODUCTION

Thank you for choosing the OVE Decors Bel Frameless Sliding Shower Door. This manual provides detailed instructions for the safe and proper installation, operation, and maintenance of your new shower door. Please read all instructions carefully before beginning installation and keep this manual for future reference. This product is designed to enhance your bathroom with its modern frameless design, soft-close technology, and durable construction.

2. SAFETY INFORMATION

Your safety is paramount. Please adhere to the following safety guidelines during installation and use:

- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, during installation.
- Handle glass panels with extreme care. Tempered glass is strong but can shatter into small pieces if its edges are impacted.
- Ensure the installation area is clear of obstructions and well-lit.
- Verify that the wall structure can support the weight of the shower door. Consult a professional if unsure.
- Do not attempt to install the shower door alone. Two or more people are required due to the weight and size of the glass panels.
- Follow all local building codes and plumbing regulations.
- Keep children and pets away from the installation area.

3. PACKAGE CONTENTS

Carefully unpack all components and verify that all parts are present and undamaged before beginning installation. If any parts are missing or damaged, do not proceed with installation and contact customer support.

- Shower Door Glass Panels (1 sliding, 1 fixed)
- Aluminum Rail System
- Oversized Vertical Bar Handles
- Roller Accents
- Watertight Seals
- Installation Hardware Kit

4. SETUP AND INSTALLATION

This section outlines the steps for installing your OVE Decors Bel shower door. Professional installation is recommended.

4.1 Before You Begin

- Measure your shower opening to ensure it falls within the 58-inch to 60-inch width range.
- Ensure the shower base and walls are plumb and level. The door features out-of-plumb adjustability for minor variations.
- Gather all necessary tools.

4.2 Tools Required

- Tape Measure
- Level
- Drill
- Screwdriver Set
- Caulking Gun and Silicone Sealant
- Pencil
- Safety Glasses and Gloves

4.3 Step-by-Step Installation

1. **Prepare the Opening:** Clean the shower base and wall surfaces where the door will be installed. Ensure they are dry and free of debris.
2. **Install Wall Profiles:** Attach the vertical wall profiles to the shower walls using the provided screws and anchors. Use a level to ensure they are perfectly vertical.
3. **Install Bottom Track:** Secure the bottom track to the shower base, aligning it with the wall profiles. Apply silicone sealant as per instructions to ensure a watertight seal.
4. **Mount Top Rail:** Install the top rail, which houses the rolling mechanism, between the wall profiles. This rail is adjustable to accommodate varying widths.
5. **Position Fixed Panel:** Carefully place the fixed glass panel into its designated position within the wall profile and bottom track. Secure it according to the hardware instructions.
6. **Install Sliding Panel Rollers:** Attach the rollers to the top edge of the sliding glass panel. These rollers are part of the premium engineered rolling mechanism system.
7. **Hang Sliding Panel:** Carefully lift and hang the sliding glass panel onto the top rail, ensuring the rollers engage smoothly with the track.
8. **Install Handles:** Attach the oversized vertical bar handles to the sliding door.
9. **Adjust and Seal:** Make any necessary adjustments to ensure smooth operation and a proper fit. Apply silicone sealant along all seams and joints to create a watertight enclosure. Allow sealant to cure completely before use.

Choose Your Hardware Finish.

5. OPERATING INSTRUCTIONS

The OVE Decors Bel shower door is designed for smooth and quiet operation.

5.1 Sliding Door Operation

- To open the door, gently push or pull the oversized vertical bar handle in the desired direction. The door will glide smoothly along the top rail.
- The soft-close technology ensures the door comes to a quiet and controlled stop when closing, preventing slamming and extending the product's lifespan.
- Ensure no obstructions are in the path of the sliding door during operation.

Soft-Close Sliding Door

Smooth opening and closing, and secure close.

6. MAINTENANCE AND CARE

Proper care will ensure the longevity and pristine appearance of your shower door.

- **Glass Cleaning:** Clean glass panels regularly with a soft cloth and a non-abrasive glass cleaner. Avoid harsh chemicals, abrasive pads, or scouring powders that can scratch the glass or damage the watertight seals.
- **Hardware Cleaning:** Wipe down metal components (satin nickel finish) with a soft, damp cloth. Do not use abrasive cleaners or strong detergents, as these can damage the finish. The MetalGuard™ feature helps keep hardware shiny and spotless.
- **Seal Maintenance:** Periodically inspect the watertight seals for any signs of wear or damage. Replace them if necessary to prevent leaks.
- **Track Maintenance:** Keep the top rail and bottom track free of soap scum, hair, and debris to ensure smooth sliding operation.

Figure 6: The MetalGuard™ technology helps protect the hardware finish, ensuring it remains shiny and resistant to tarnishing over time.

7. TROUBLESHOOTING

Refer to the table below for common issues and their solutions.

Problem	Possible Cause	Solution
Door does not slide smoothly.	Debris in track, misaligned rollers, or worn components.	Clean the top rail and bottom track. Check roller alignment and adjust if necessary. If components are worn, contact customer support for replacements.
Water leaks from the enclosure.	Damaged or improperly installed seals, insufficient sealant.	Inspect all seals and replace any that are damaged. Reapply silicone sealant to all joints and seams where leaks are detected. Ensure proper curing time.
Door does not close completely.	Obstruction in the track, misaligned door, or issue with soft-close mechanism.	Clear any obstructions from the track. Check door alignment and adjust. If the soft-close mechanism is faulty, contact customer support.
Glass appears cloudy or stained.	Soap scum or hard water deposits.	Clean regularly with a non-abrasive glass cleaner. For stubborn deposits, use a specialized hard water stain remover designed for glass.

8. PRODUCT SPECIFICATIONS
