SURF PRO BO-1975-5

SURF PRO Grout Sealer Instruction Manual

Model: BO-1975-5

INTRODUCTION

Welcome to the instruction manual for the SURF PRO Intelligent Grout Sealer. This product is designed to provide advanced, invisible, and long-lasting protection for your grout against a variety of stains. By following these instructions, you can ensure optimal performance and longevity of your sealed surfaces. This silicone-free formula penetrates grout to create an invisible barrier, preserving its natural appearance while offering superior stain resistance.

SAFETY INFORMATION

WARNING: Always read and understand all safety information before using this product.

- Do not mix with other household chemicals.
- May irritate eyes and skin. Avoid contact with eyes and prolonged contact with skin.
- Keep out of reach of children and pets.
- Use in a well-ventilated area.
- In case of eye contact, flush immediately with plenty of water for at least 15 minutes and seek medical attention.
- In case of skin contact, wash thoroughly with soap and water.
- If swallowed, do not induce vomiting. Call a poison control center or doctor immediately.
- Store in a cool, dry place, away from direct sunlight and extreme temperatures.

PRODUCT OVERVIEW

What's in the Box

- 1 x 16.67oz (493 ml) bottle of SURF PRO Intelligent Grout Sealer (Model: BO-1975-5)

Key Features

- **Advanced Protection:** Offers top-notch defense against a variety of stains, ensuring the longevity of your grout.
- **Easy Application:** Simple shake-and-apply process for new grout.
- **Crystal Clear Transparency:** Invisible formula preserves the natural look of your grout.
- **Stain-Resistant Excellence:** Actively repels potential stains, keeping grout spotless and vibrant.
- **Silicone-Free:** Ensures a non-greasy finish and maximum breathability for surfaces.
- **Long-Lasting:** Reduces the frequency of resealing.

SETUP

Proper preparation of the surface is crucial for the effective application and long-lasting performance of the grout sealer. Ensure the area is clean and dry before beginning the application process.

Surface Preparation

1. **Clean the Grout:** Thoroughly clean the grout lines to remove any dirt, grime, old sealers, or contaminants. For best results, use a dedicated grout cleaner.
2. **Rinse and Dry:** Rinse the cleaned area thoroughly with clean water to remove any cleaning solution residue. Allow the grout to dry completely. This may take 24 hours or more depending on humidity and ventilation. The grout must be bone dry for the sealer to penetrate effectively.
3. **Protect Adjacent Surfaces:** Cover any adjacent surfaces (e.g., baseboards, flooring, fixtures) that you do not wish to seal with painter's tape or plastic sheeting.
4. **Shake Well:** Before each use, shake the bottle of SURF PRO Grout Sealer vigorously for at least 30 seconds to ensure the formula is well-mixed.

Easy Application
Ensure a full cure in 24 hours
for optimal results.

OPERATING INSTRUCTIONS

Application Steps

The SURF PRO Grout Sealer is designed for easy, one-coat application on new grout. For older or more porous grout, a second coat may be beneficial.

1. **Apply the Sealer:** Using a small brush, foam applicator, or a clean cloth, apply a thin, even coat of the sealer directly to the grout lines. Ensure complete saturation of the grout. Avoid applying excessive amounts to the surrounding tiles.
2. **Wipe Excess:** Immediately wipe off any excess sealer from the tile surface with a clean, dry cloth. Do not allow the sealer to dry on the tile surface, as it may leave a residue.
3. **Second Coat (Optional):** If applying a second coat, wait approximately 1-2 hours after the first coat has been applied and wiped clean. Then, repeat steps 1 and 2.
4. **Cure Time:** Allow the sealed area to cure for a full 24 hours before exposing it to water, heavy traffic, or cleaning. During this time, avoid walking on the treated area or allowing any moisture to come into contact with the grout.

Long-Lasting

Enjoy the benefits of long-lasting protection, reducing the frequency of resealing.

One-Coat Application
Save time and effort with our one coat application process.

MAINTENANCE

Once cured, the SURF PRO Grout Sealer provides long-lasting protection. To maintain the integrity of the seal and the cleanliness of your grout:

- **Regular Cleaning:** Clean sealed grout regularly with a pH-neutral cleaner. Avoid harsh abrasive cleaners or strong acids/alkalis, as these can degrade the sealer over time.
- **Spill Cleanup:** Wipe up spills promptly, especially acidic or oily substances, to prevent potential staining.
- **Reapplication:** While the sealer offers long-lasting protection, the frequency of reapplication depends on traffic, cleaning habits, and the type of grout. Monitor your grout for signs of reduced water repellency (e.g., water soaking into the grout instead of beading up). Reapply as needed, typically every few years, following the original application instructions.

TROUBLESHOOTING

If you encounter any issues while using the SURF PRO Grout Sealer, refer to the following common concerns and their solutions:

- **Sealer not making a difference / Grout still changing color when wet:**

This often indicates that the sealer has not fully cured or was not applied to a completely dry surface. Ensure the grout is bone dry before application and allow the full 24-hour cure time without exposure to moisture. For very porous grout, a second coat may be necessary after the first has dried.

- **White residue on tiles after application:**

This occurs when excess sealer is left to dry on the tile surface. It is crucial to wipe off any excess immediately after application. If residue has dried, it may be carefully removed with a non-abrasive pad and a small amount of denatured alcohol or a specialized haze remover, testing in an inconspicuous area first.

- **Uneven sealing:**

Ensure even application by using a consistent method (brush, foam applicator) and covering all grout lines thoroughly. Overlap slightly to prevent missed spots.

- **Product appears cloudy or separated in the bottle:**

Always shake the bottle vigorously before each use to ensure the formula is well-mixed. If the product remains cloudy or separated after shaking, contact customer support.

SPECIFICATIONS

Attribute	Detail
Product Name	SURF PRO Intelligent Grout Sealer
Model Number	BO-1975-5
Volume	16.67 oz (493 ml)
Material	Liquid
Compatible Material	Grout
Product Dimensions (L x W x H)	3.94 x 6.3 x 1.97 inches
Item Weight	1.26 Pounds
Manufacturer	SURF PRO
Country of Origin	Canada

WARRANTY AND SUPPORT

SURF PRO is committed to providing high-performing products. This product is proudly made in North America, reflecting our dedication to quality and craftsmanship.
