## KvyusFlourish B0CMKXP6KF

# KvyusFlourish Rectangle Planter Instruction Manual

Model: B0CMKXP6KF

---

## INTRODUCTION

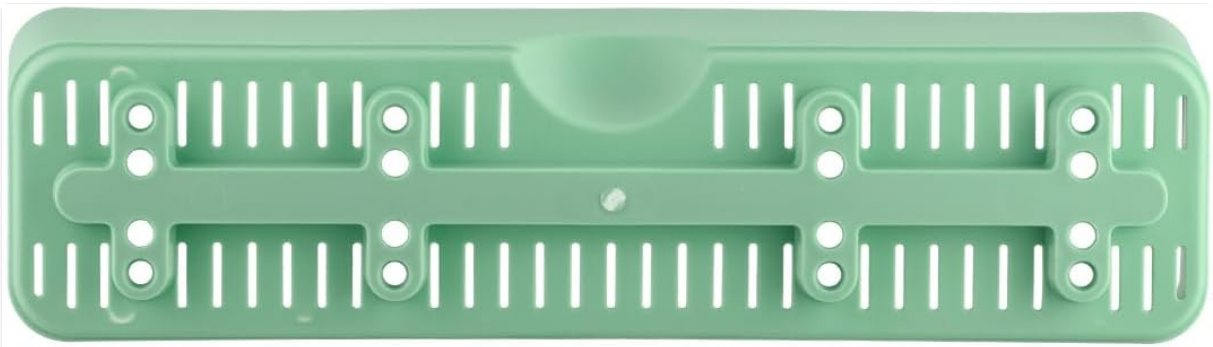

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your KvyusFlourish 6 Pack Rectangle Planters. These planters are designed for both indoor and outdoor use, featuring a self-watering system with integrated drainage holes and saucers to promote healthy plant growth.

Image: A set of KvyusFlourish rectangle planters, showcasing their design and potential for various plants.

## KEY FEATURES

- **Integrated Drainage System:** Each planter includes drainage holes and a removable saucer to prevent overwatering and collect excess moisture, ensuring optimal root health.
- **Self-Watering Capability:** The design allows for a water reservoir in the saucer, providing consistent moisture to plant roots and reducing the frequency of watering.
- **Durable Construction:** Made from high-quality, long-lasting plastic suitable for various environmental conditions.
- **Versatile Design:** Rectangular shape is ideal for window sills, balconies, and narrow spaces, accommodating herbs, vegetables, succulents, and flowers.
- **Air Circulation Design:** A mesh-like structure at the bottom of the planting pot enhances air circulation for robust root development.

## Mesh Drainage Hole

**provides good drainage and aeration, which are beneficial for the healthy growth of plants and helps prevent common root-related issues.**

## SETUP INSTRUCTIONS

The KvyusFlourish Rectangle Planters are designed for simple assembly and immediate use.

1. **Unpack Components:** Carefully remove all planters and saucers from the packaging. Verify that you have received all 6 planting pots and 6 corresponding saucers.
2. **Assemble Planter:** Place each rectangular planting pot securely into its matching saucer. Ensure the pot sits flush within the saucer, allowing the drainage hole to align with the water collection area.
3. **Prepare for Planting:** Your planters are now ready for soil and plants.

**Both a Water Inlet  
and a Drainage Hole**

**Easy to water  
and no need to worry  
about over-watering**

**Planting pot**

**Put soil and  
plants/herbs/  
Succulents/  
vegetables/  
flowers...  
into the  
planting pot**

**Plant Saucer**

**to Catch Excess Water**

## OPERATING INSTRUCTIONS

### Planting

Fill the planting pot with your preferred potting mix, leaving adequate space for your chosen plants. Gently place your plants into the soil, ensuring their roots are well-covered. Lightly compact the soil around the base of the plants.

### Watering

Water your plants from the top until water begins to drain into the saucer. The integrated drainage system allows excess water to collect in the saucer, which can then be absorbed by the plant roots as needed. This self-watering feature helps maintain consistent moisture levels and prevents root rot. For optimal results, allow the saucer to dry out slightly before refilling.

## MAINTENANCE

### Cleaning

To clean your planters, remove plants and soil. Wash the planting pot and saucer with mild soap and water. Rinse thoroughly and allow to air dry before replanting or storing. Regular cleaning helps prevent the buildup of mineral deposits and algae.

### Storage

When not in use, store the planters in a cool, dry place away from direct sunlight to prolong their lifespan. They can be stacked for compact storage.

## TROUBLESHOOTING

Issue	Possible Cause	Solution
-------	----------------	----------

Issue	Possible Cause	Solution
Water overflowing from saucer	Excessive watering beyond the saucer's capacity.	Reduce the amount of water applied at one time. Allow plants to absorb water from the saucer before adding more.
Plant roots appear unhealthy (e.g., mushy)	Consistent overwatering or poor drainage.	Ensure the drainage holes are clear and the saucer is not constantly full. Allow the soil to dry slightly between waterings. The integrated drainage system is designed to prevent this, but extreme overwatering can still occur.
Poor plant growth	Inadequate light, nutrients, or improper watering.	Review plant-specific care requirements for light, fertilizer, and watering frequency. Ensure the planter is placed in an appropriate environment.

## PRODUCT SPECIFICATIONS

Attribute	Detail
Material	Plastic
Color	Green (as per current product variant)
Shape	Rectangular
Indoor/Outdoor Usage	Indoor
Product Dimensions (L x W x H)	16" x 4.4" x 4.7"
Number of Pieces	6 (per pack)
Included Components	Saucer
Item Weight	4.42 pounds (for the pack)
