### 3. SETUP

1. **Connect to Power:** Plug the USB-C connector of the attached 4-foot cable into a compatible USB-C power adapter (not included). For optimal 15W fast charging, use a power adapter that supports Power Delivery (PD) with an output of at least 9V/1.8A or 12V/1.67A.
2. **Power On:** Once connected to a power source, the charger is ready for use. There is no power button.

### 4. OPERATING INSTRUCTIONS

#### 4.1 Wireless Charging

1. **Align Your Device:** Place your MagSafe-compatible iPhone (iPhone 12, 13, 14, or 15 series) onto the black charging surface of the TYLT charger. The charger will magnetically snap into place, ensuring proper alignment for efficient charging.
2. **Charging Indication:** Your iPhone's screen will indicate that charging has begun. The charger is designed to work with most MagSafe-compatible phone cases, eliminating the need for case

removal.

3. **Optimal Charging:** Ensure no foreign objects (e.g., metal plates, credit cards) are between your phone and the charger, as this can interfere with wireless charging.

## 4.2 Using the Integrated Kickstand

1. **Extend the Kickstand:** Gently pull out the integrated ring from the back of the charger.
2. **Adjust Viewing Angle:** The ring can rotate and adjust to multiple viewing angles, allowing you to prop up your phone in either portrait or landscape orientation for hands-free viewing of videos, video calls, or other content.
3. **Retract the Kickstand:** When not in use, fold the ring back into its recess on the charger for a compact and portable form factor.

## 5. MAINTENANCE

- **Cleaning:** Disconnect the charger from the power source before cleaning. Use a soft, dry, lint-free cloth to wipe the surface of the charger. Do not use harsh chemicals, cleaning solvents, or strong detergents.
- **Storage:** Store the charger in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the charger or subjecting it to strong impacts. Do not disassemble the device.
