5. To release, press the button on the central buckle.

5.2 Adjusting the Seat Recline

The seat offers multiple recline positions for your child's comfort. Locate the recline adjustment mechanism, usually a lever or strap system at the back of the seat. Adjust to the desired angle and ensure it locks into place.

5.3 Operating the Brakes

The stroller is equipped with a one-touch rear brake. To engage the brake, press down firmly on the brake pedal located near the rear wheels. To release, lift the pedal upwards. Always ensure the brake is fully engaged when the stroller is stationary.

5.4 Swivel and Lock Front Wheels

The front wheels can swivel 360° for easy maneuverability or be locked for stability on uneven terrain. Locate the locking mechanism above each front wheel. Push down to lock the wheels in a straight position, and lift up to allow them to swivel freely.

5.5 Adjusting the Sun Canopy

The large sun canopy is adjustable and features a sun visor and a viewing window. Simply pull the canopy forward or push it back to adjust its position. Use the viewing window to check on your child without disturbing them.
