## UPS Battery Center 100008734

# UPSBatteryCenter 12V 2.6Ah Replacement Battery for ONN 100008734 Medium Party Speaker Instruction Manual

## INTRODUCTION

This instruction manual provides essential information for the safe and effective use of your new UPSBatteryCenter 12 Volt 2.6Ah Replacement Battery. This battery is specifically designed as a compatible replacement for the ONN 100008734 Medium Party Speaker. Please read this manual thoroughly before installation and operation to ensure optimal performance and longevity of your battery.

**Important Safety Information:** Always handle batteries with care. Refer to the safety guidelines in this manual.

## PRODUCT OVERVIEW

The UPSBatteryCenter 12V 2.6Ah replacement battery is a high-quality, rechargeable, sealed lead-acid battery. It is designed for reliable power delivery and a long service life, typically 3-5 years under normal conditions. This battery is maintenance-free, non-spillable, and features F1 terminals for easy connection.

**Figure 1:** UPSBatteryCenter 12V 2.6Ah Sealed Lead Acid Replacement Battery. This image displays the black battery unit with the UPS Battery Center logo, indicating its 12V 2.6Ah rating, TLV1226 model, and key features such as "HIGH PERFORMANCE MAINTENANCE FREE SEALED RECHARGEABLE BATTERY" and "100% SEALED AGM - NON-SPILLABLE". It also shows the F1 terminals at the top.

### Key Features:

- **Voltage:** 12 Volts
- **Capacity:** 2.6 Ampere-hours (Ah)
- **Terminal Type:** F1 (0.187")
- **Battery Type:** Sealed Lead Acid (SLA), Absorbent Glass Mat (AGM)
- **Maintenance:** Maintenance-free and non-spillable
- **Compatibility:** Direct replacement for ONN 100008734 Medium Party Speaker

### SETUP AND INSTALLATION

This section outlines the general procedure for replacing the battery in your ONN 100008734 Medium Party Speaker. Always refer to your speaker's original manual for specific instructions regarding battery compartment access and safety precautions. If you are unsure, consult a qualified technician.

### Required Tools:

- Screwdriver (appropriate type for your speaker)
- Insulated gloves (recommended for safety)

### Installation Steps:

1. **Power Off Speaker:** Ensure the ONN 100008734 speaker is completely powered off and unplugged from any power source.
2. **Locate Battery Compartment:** Identify and open the battery compartment on your speaker. This usually involves removing screws or latches.
3. **Disconnect Old Battery:** Carefully disconnect the terminals of the old battery. Note which wire connects to the positive (+) terminal (usually red) and which connects to the negative (-) terminal (usually black). Disconnect the negative terminal first, then the positive.
4. **Remove Old Battery:** Gently remove the old battery from its compartment.
5. **Insert New Battery:** Place the new UPSBatteryCenter replacement battery into the compartment, ensuring proper orientation.
6. **Connect New Battery:** Connect the positive (+) wire to the positive terminal of the new battery, then connect the negative (-) wire to the negative terminal. Ensure connections are secure.
7. **Secure Compartment:** Close and secure the battery compartment.
8. **Initial Charge:** Although the battery arrives fully charged, it is recommended to fully charge the speaker using its original charger before first use to calibrate the battery management system.

**Caution:** Do not short circuit the battery terminals. Do not attempt to open the battery casing.

## OPERATING INSTRUCTIONS

---

Your UPSBatteryCenter replacement battery is designed to function seamlessly with your ONN 100008734 Medium Party Speaker. The speaker's internal charging system will manage the battery's charge and discharge cycles.

### Charging:

- Always use the original charger provided with your ONN 100008734 speaker.
- Connect the speaker to a power outlet when the battery level is low.
- Avoid overcharging by disconnecting the charger once the speaker indicates a full charge, though modern charging systems typically prevent this.

### Usage:

- The battery provides portable power for your speaker.
- Performance may vary based on speaker volume, features used, and environmental conditions.

## MAINTENANCE

---

While the UPSBatteryCenter battery is maintenance-free, following these guidelines can help maximize its lifespan:

- **Temperature:** Store and operate the battery within recommended temperature ranges (typically 20°C to 25°C or 68°F to 77°F). Extreme temperatures can reduce battery life.
- **Storage:** If storing the speaker for an extended period, ensure the battery is fully charged. Recharge every 3-6 months to prevent deep discharge, which can permanently damage the battery.

- **Cleaning:** Keep battery terminals clean and free of corrosion. Use a dry cloth to wipe them if necessary.
- **Recycling:** When the battery reaches the end of its life, it **must be recycled** properly. Do not dispose of it in household waste. Contact your local recycling center for information on lead-acid battery disposal.

## TROUBLESHOOTING

If you experience issues with your replacement battery, consider the following common solutions:

Problem	Possible Cause	Solution
Speaker does not power on after battery replacement.	Incorrect terminal connection, loose connection, or battery not charged.	Verify positive and negative terminals are correctly connected. Ensure connections are secure. Connect the speaker to its charger and allow it to charge for several hours.
Battery life is shorter than expected.	High volume usage, extreme temperatures, or battery not fully charged.	Ensure the battery is fully charged before use. Operate the speaker in moderate temperatures. Reduce volume or features that consume more power.
Speaker not charging.	Faulty charger, loose charging port, or internal speaker issue.	Check the speaker's charging cable and adapter. Ensure the charging port is clean and secure. If the issue persists, the problem may lie with the speaker's internal charging circuit, not the battery.

If troubleshooting steps do not resolve the issue, please contact UPS Battery Center customer support.

## SPECIFICATIONS

Specification	Value
Nominal Voltage	12V
Nominal Capacity	2.6Ah
Terminal Type	F1 (0.187")
Battery Type	Sealed Lead Acid (SLA), AGM
Weight	1.87 lbs (0.85 kg)
Length	70mm (2.76")
Width	48mm (1.89")
Height	98mm (3.86")
Expected Life Span	3-5 years

## WARRANTY INFORMATION

The UPSBatteryCenter 12V 2.6Ah Replacement Battery is covered by a **1-Year Replacement Warranty** from the date of purchase. This warranty covers manufacturing defects and ensures the battery performs according to specifications under normal use.

For warranty claims or inquiries, please retain your proof of purchase and contact UPS Battery Center customer support.

**Proposition 65 Warning:** This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
