INTRODUCTION

This manual provides comprehensive instructions for utilizing the Meta Quest 3 in professional environments. While widely recognized for gaming, the Meta Quest 3 possesses significant potential as a productivity tool, capable of redefining how work is approached. This guide details its functionalities and applications specifically tailored for workplace use.

Note: This manual is an independent guide and is not officially endorsed by Meta.

1. SETUP AND BASIC CONFIGURATION

To begin using your Meta Quest 3 for workplace applications, follow these initial setup steps to ensure optimal performance and user experience.

- Unboxing and Initial Charge:** Carefully remove the Meta Quest 3 headset and controllers from their packaging. Connect the headset to a power source using the provided USB-C cable and power adapter. Ensure the device is fully charged before first use.
- Headset Fit and Comfort:** Adjust the head strap and interpupillary distance (IPD) to achieve a clear and comfortable view. The IPD can be adjusted via a wheel on the bottom of the headset.
- Controller Pairing:** The controllers should automatically pair with the headset upon initial setup. If not, follow the on-screen instructions or refer to the official Meta Quest support documentation for manual pairing.
- Guardian System Setup:** Define your play space by setting up the Guardian system. This creates a virtual boundary to prevent collisions with physical objects. For workplace use, define a clear, safe area.
- Account Login and Software Updates:** Log in with your Meta account. Ensure the headset's software is updated to the latest version for access to all features and security enhancements.

HOW TO SET UP MPL'S META QUEST 3

We are happy that you borrowed the Moultonborough Library's Meta Quest 3 VR set. Please note that you are responsible for any damage or loss to the unit, as well as any cost to running paid games or VR apps.

To use the Meta Quest 3 you will need a mobile device with a wifi connection and the free Meta Horizon app.

The following instructions came from the Meta Quest 3 support pages, found here: <https://www.meta.com/help/quest/articles/getting-started/getting-started-with-quest-3>

1. Press and hold the power button on the left side of the headset for three seconds, or until you hear a chime sound and see the Meta symbol  appear in your headset.

2. Securely attach your controllers to each wrist using the adjustable straps.

3. Turn on your controllers by pressing and holding Menu button  on the left controller and Meta button  on the right.

4. After holding Menu button  and Meta button  for two seconds, you should see a blinking white light and feel a haptic response, indicating your controllers are ready to go.

From here you'll progress through the first part of the in-VR tutorial including choosing a language and connecting to Wi-Fi, before moving on to adjusting the fit of your Meta Quest 3.

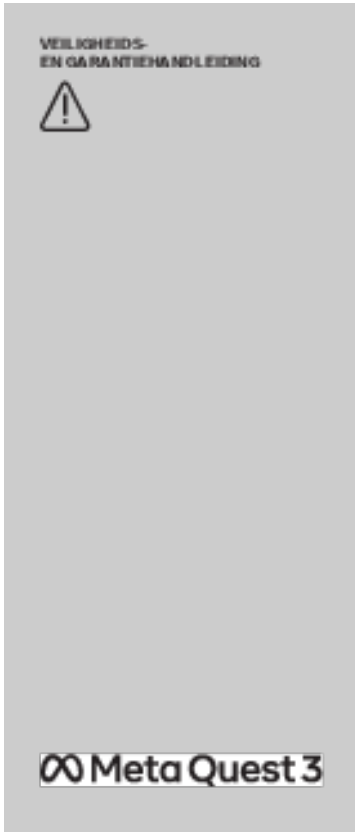

Note: The headset may not be completely charged when it leaves the Library, so make sure you connect your headset to a charger when you arrive home. There may be software updates that will happen automatically.
