OPERATING YOUR IPHONE

1. Basic Navigation and Dynamic Island

The iPhone 15 features a 6.1-inch Super Retina XDR display and utilizes gesture-based navigation. Swipe up from the bottom to go home, swipe up and hold to view recent apps. The Dynamic Island at the top of the screen adapts to show alerts, activities, and live notifications.

Dynamic Island. For when things just pop up.

When something bubbles up, just touch and hold to act on it. **Dynamic Island expands** so you can find out when your dinner will arrive, rewind your podcast, or see if your AirPods have connected and their battery level.

Double bubble: If two activities are happening at once, **Dynamic Island splits in two**. So now you can chat with a friend and keep an eye on your timer. Or follow your team's score while you check your running pace. Just touch and hold to expand one of the activities, or tap to open the app.
