Troubleshooting

Common Issues and Solutions

- **Device not turning on:** Ensure the battery is charged. Connect the phone to its charger and wait a few minutes before attempting to power it on again.
- **Poor network signal:** Check if your SIM card is correctly inserted. Ensure you are within your carrier's coverage area. Restarting the phone can sometimes resolve temporary network issues.

- **Apps crashing or freezing:** Close and reopen the app. If the issue persists, clear the app's cache and data in Settings > Apps. As a last resort, uninstall and reinstall the app.
- **Battery draining quickly:** Reduce screen brightness, disable unused features like Wi-Fi or Bluetooth when not needed, and close background apps. Check battery usage in Settings to identify power-hungry applications.
