7. TROUBLESHOOTING

If you encounter any issues with your toaster, refer to the following common problems and solutions:

| Problem | Possible Cause | Solution |
|---------|----------------|----------|
|---------|----------------|----------|

| Problem | Possible Cause | Solution |
|--------------------------------|--|--|
| Toaster does not turn on. | Not plugged in; power outage; faulty outlet. | Check power cord connection; check circuit breaker; try a different outlet. |
| Bread does not toast evenly. | Uneven bread thickness; crumb tray full. | Ensure bread slices are of similar thickness; clean crumb tray. The self-centering system helps, but very irregular slices may still toast unevenly. |
| Bread is stuck in the toaster. | Bread too large or thick; carriage lever not fully raised. | Unplug the toaster, allow to cool, then carefully remove bread. Use the extra-lift system or tongs. |
| Smoke coming from toaster. | Crumb tray full; food lodged in slots; first use residue. | Press Cancel, unplug, allow to cool. Clean crumb tray. Remove any food particles. For first use, this is normal. |

If the problem persists after trying these solutions, please contact customer support.
