

Body-Solid F600

Body-Solid Fusion 600 Bi-Angular Personal Trainer Gym

Model: F600/2 | Brand: Body-Solid

INTRODUCTION

The Body-Solid Fusion 600 is a comprehensive multi-station home gym designed for a full-body workout. It integrates traditional strength training with functional exercises, offering versatility and efficiency in a compact design. This manual provides essential information for the safe and effective use, assembly, maintenance, and troubleshooting of your Fusion 600 gym.

Key features include a revolutionary Bi-Angular Press Arm for increased muscle interaction, a dedicated seated leg curl station, and functional training arms, allowing for over 60 different exercises.

SAFETY INFORMATION

Before operating the Body-Solid Fusion 600, please read and understand all instructions and warnings. Failure to do so may result in serious injury or damage to the equipment.

- Consult a physician before beginning any exercise program.
- Keep children and pets away from the equipment during use.
- Ensure all nuts and bolts are securely tightened before each use.
- Do not use the equipment if any parts are damaged or worn.
- Perform exercises in a controlled manner; avoid sudden or jerky movements.
- Maintain adequate clear space around the machine for safe operation.
- The maximum weight recommendation for the stack is 210 pounds. Do not exceed this limit.

SETUP AND ASSEMBLY

The Body-Solid Fusion 600 requires assembly. It is recommended that two or more people assemble the unit. Refer to the separate assembly manual for detailed, step-by-step instructions, diagrams, and a complete parts list. Ensure all components are present before beginning assembly.

- **Unpacking:** Carefully remove all components from the packaging. Lay them out in an organized manner.
- **Tools Required:** Standard wrenches and an adjustable wrench are typically needed.
- **Location:** Choose a flat, stable surface for the gym, ensuring sufficient space for all exercises and safe movement around the machine. The compact footprint measures 76" (L) x 48" (W) x 83" (H).
- **Component Identification:** Familiarize yourself with the parts using the assembly manual's diagrams.
- **Cable Routing:** Pay close attention to cable routing diagrams to ensure smooth operation and prevent wear. The

military-spec steel aircraft cables with nylon sheathing are designed for durability.

- **Final Inspection:** After assembly, thoroughly inspect all connections, bolts, and cables to ensure they are secure and properly installed.

Image: The Body-Solid Fusion 600 Bi-Angular Personal Trainer Gym, showing its compact design and a user engaging with the lat pulldown station. The machine features a grey frame, black upholstery, and a visible weight stack.

OPERATING INSTRUCTIONS

The Fusion 600 offers a wide range of exercises. Adjustments for seat height, press arm position, and cable attachments are crucial for proper form and effectiveness.

Adjustments:

- **Seat Adjustment:** Adjust the seat height to ensure proper alignment for various exercises, particularly for leg curls and chest presses.
- **Bi-Angular Press Arm:** This arm provides a converging movement for enhanced muscle interaction. Adjust its starting position as needed for chest press, incline press, or shoulder press exercises.
- **Weight Stack:** Select the desired weight by inserting the pin into the appropriate weight plate. Ensure the pin is fully inserted before beginning an exercise.
- **Cable Attachments:** Easily attach and detach various handles (e.g., lat bar, mid row handles, single handles) to the high, mid, and low pulleys for diverse exercises.

Example Exercises:

The Fusion 600 supports over 60 exercises. Here are a few examples:

- **Chest Press:** Adjust the Bi-Angular Press Arm. Sit with your back against the pad, grasp the handles, and push forward.
- **Lat Pulldown:** Attach the lat bar to the high pulley. Sit facing the machine, grasp the bar with an overhand grip, and pull down to your upper chest.
- **Seated Leg Curl:** Sit on the leg curl station, position your shins against the pad, and curl your legs upwards.
- **Mid Row:** Utilize the dedicated mid row handles for targeted back workouts.
- **Functional Trainer Arms:** Use these for exercises like cable crossovers, tricep pushdowns, and bicep curls, providing a wide range of motion.

Always perform a warm-up before exercising and a cool-down afterwards. Focus on controlled movements and proper breathing.

MAINTENANCE

Regular maintenance ensures the longevity and safe operation of your Body-Solid Fusion 600.

- **Cleaning:** Wipe down the frame and upholstery with a damp cloth after each use to prevent sweat buildup and maintain hygiene. Avoid abrasive cleaners.
- **Cable Inspection:** Periodically inspect all cables for fraying, kinks, or wear. Replace any damaged cables immediately. The military-spec steel aircraft cables are designed to withstand up to 2,200lb tension strength.
- **Pulley Inspection:** Check pulleys for smooth operation and ensure they are free of debris.
- **Bolt Tightness:** Routinely check and tighten all nuts and bolts, especially those connecting moving parts.
- **Lubrication:** Apply a silicone-based lubricant to guide rods and pivot points as needed to ensure smooth movement of the weight stack and other components.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Weight stack sticking or not moving smoothly.	Guide rods are dirty or dry; weight plates are misaligned.	Clean and lubricate guide rods with silicone spray. Check for any obstructions or misaligned plates.
Cables appear loose or frayed.	Cable tension needs adjustment; cable is worn or damaged.	Refer to the assembly manual for cable tension adjustment. Replace frayed or damaged cables immediately.

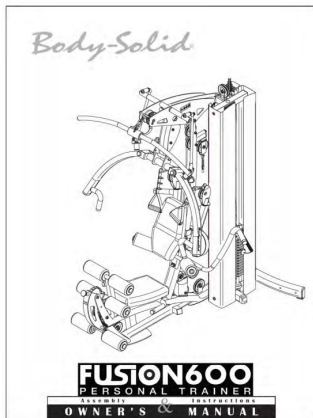

Problem	Possible Cause	Solution
Unusual noises (squeaking, grinding) during operation.	Loose bolts; lack of lubrication; worn pulleys.	Check and tighten all bolts. Lubricate pivot points and guide rods. Inspect pulleys for wear and replace if necessary.
Machine feels unstable.	Not on a level surface; loose frame bolts.	Ensure the gym is on a flat, stable surface. Check and tighten all frame bolts.

SPECIFICATIONS

- Model Name:** F600/2
- Brand:** Body-Solid
- Style:** 210lbs. Weight Stack
- Dimensions (L x W x H):** 76" x 48" x 83"
- Weight:** 621 lbs (approximate, fully assembled)
- Maximum Weight Recommendation:** 210 Pounds (weight stack)
- Cable Tension Strength:** Up to 2,200 lbs (military-spec steel aircraft cables)
- Frame Material:** 11 gauge oval tubing, 6mm upper support plates
- Upholstery:** DuraFirm pads for lumbar support
- Color:** Grey
- Strap Type:** Cable/Pulley straps
- Handle Type:** Fixed Handle (Mid Row Handles included)

WARRANTY AND SUPPORT

- Body-Solid offers a comprehensive warranty for the Fusion 600 gym.
- **Warranty Description:** Lifetime Body-Solid commercial warranty.
 - For warranty claims, technical support, or to order replacement parts, please contact Body-Solid customer service.
 - Visit the official Body-Solid website for the most up-to-date support information and contact details:[Body-Solid Official Store](#)
