5. OPERATING INSTRUCTIONS

The Bealife convertible armchair offers three primary configurations: armchair, chaise lounge, and single bed.

5.1 Adjusting the Backrest

The backrest can be adjusted to three different angles for optimal comfort:

- **100°:** Upright seating position.
- **140°:** Relaxed recline position.
- **180°:** Fully flat position for sleeping.

To adjust, gently push or pull the backrest to your desired angle until it locks into place.

5.2 Converting to Chaise Lounge or Single Bed

To convert the armchair into a chaise lounge or a single bed:

1. Ensure the backrest is in a suitable recline position (e.g., 140° for chaise lounge, 180° for bed).
2. Locate the pull-out mechanism beneath the seat.
3. Gently pull the footrest extension outwards. The integrated swivel casters will facilitate smooth movement.
4. Extend the footrest fully until it locks into place. The armrests will serve as support legs when fully extended.
5. For a single bed, ensure the backrest is fully reclined to 180°.

6. MAINTENANCE

Proper care will extend the life and appearance of your convertible armchair.

- **Regular Cleaning:** Vacuum the fabric regularly using an upholstery attachment to remove dust and debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner according to the product's instructions, testing on an inconspicuous area first.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading. Position the armchair away from direct sun or use curtains/blinds.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or harsh chemicals, as these can damage the fabric and frame.
- **Check Connections:** Periodically check all bolts and screws to ensure they remain tight. Retighten if necessary.

7. TROUBLESHOOTING

If you encounter any issues with your Bealife convertible armchair, refer to the following common solutions.

Problem	Possible Cause	Solution
Difficulty converting the armchair.	Mechanism obstructed or not fully engaged.	Ensure no objects are blocking the pull-out mechanism. Apply gentle, even pressure when extending or retracting. Check that casters are moving freely.
Armchair feels unstable.	Loose connections or uneven floor.	Check and tighten all assembly bolts and screws. Ensure the armchair is placed on a flat, level surface.
Backrest does not lock into position.	Mechanism not fully engaged.	Adjust the backrest to the desired angle and ensure it clicks securely into one of the three preset positions.
