Dreyoo Universal Bath Tub Spout Installation and User Manual

Model: B0CN16KYGC

INTRODUCTION

Thank you for choosing the Dreyoo Universal Bath Tub Spout. This manual provides detailed instructions for the safe installation, operation, and maintenance of your new tub spout. Please read this manual thoroughly before installation and retain it for future reference.

SAFETY INFORMATION

Always observe the following safety precautions to reduce the risk of injury or property damage:

- Ensure the main water supply is turned off before beginning any installation or maintenance.
- Wear appropriate personal protective equipment, such as safety glasses and gloves.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Do not overtighten connections, as this may damage the product or plumbing.
- This tub spout is designed for bathtub use only and does not include a diverter for shower functionality.

PACKAGE CONTENTS

Verify that all components are present before starting installation:

- Dreyoo Universal Bath Tub Spout (Matte Black)
- 1/2" to 3/4" Threaded Adapter
- Installation Tools (if included in your specific package)

SPECIFICATIONS

Brand	Dreyoo
Model Name	B0CN16KYGC
Color	Matte Black
Material	Quality Metal
Spout Length	5 inches (overall)
Connection Type	1/2" or 3/4" IPS Inside Thread (with adapter)
Product Dimensions	5.12"D x 2.52"W x 2.52"H
Item Weight	5.4 ounces

Image: This diagram provides detailed measurements of the tub spout, including its overall length, width, and the internal diameters for 1/2" and 3/4" IPS threaded pipes.

INSTALLATION INSTRUCTIONS

Follow these steps for proper installation of your Dreyoo Universal Bath Tub Spout:

1. Prepare the Installation Area

1. Turn off the main water supply to your bathroom.
2. Remove your old tub spout. This usually involves unscrewing a set screw underneath the spout or twisting it counter-clockwise if it's a threaded connection.
3. Clean the area around the pipe extending from the wall.

2. Verify Pipe Length and Connection Type

Ensure your pipe length is within the recommended range and identify your connection type.

Image: This diagram illustrates the required pipe length extending from the wall for proper installation, which should be between 4 inches and 4-3/8 inches to prevent gaps.

1. Measure the length of the pipe extending from the wall. It should be between 4 inches and 4-3/8 inches to ensure a

flush fit with the new spout.

2. Identify if your existing pipe is 1/2" IPS or 3/4" IPS threaded.

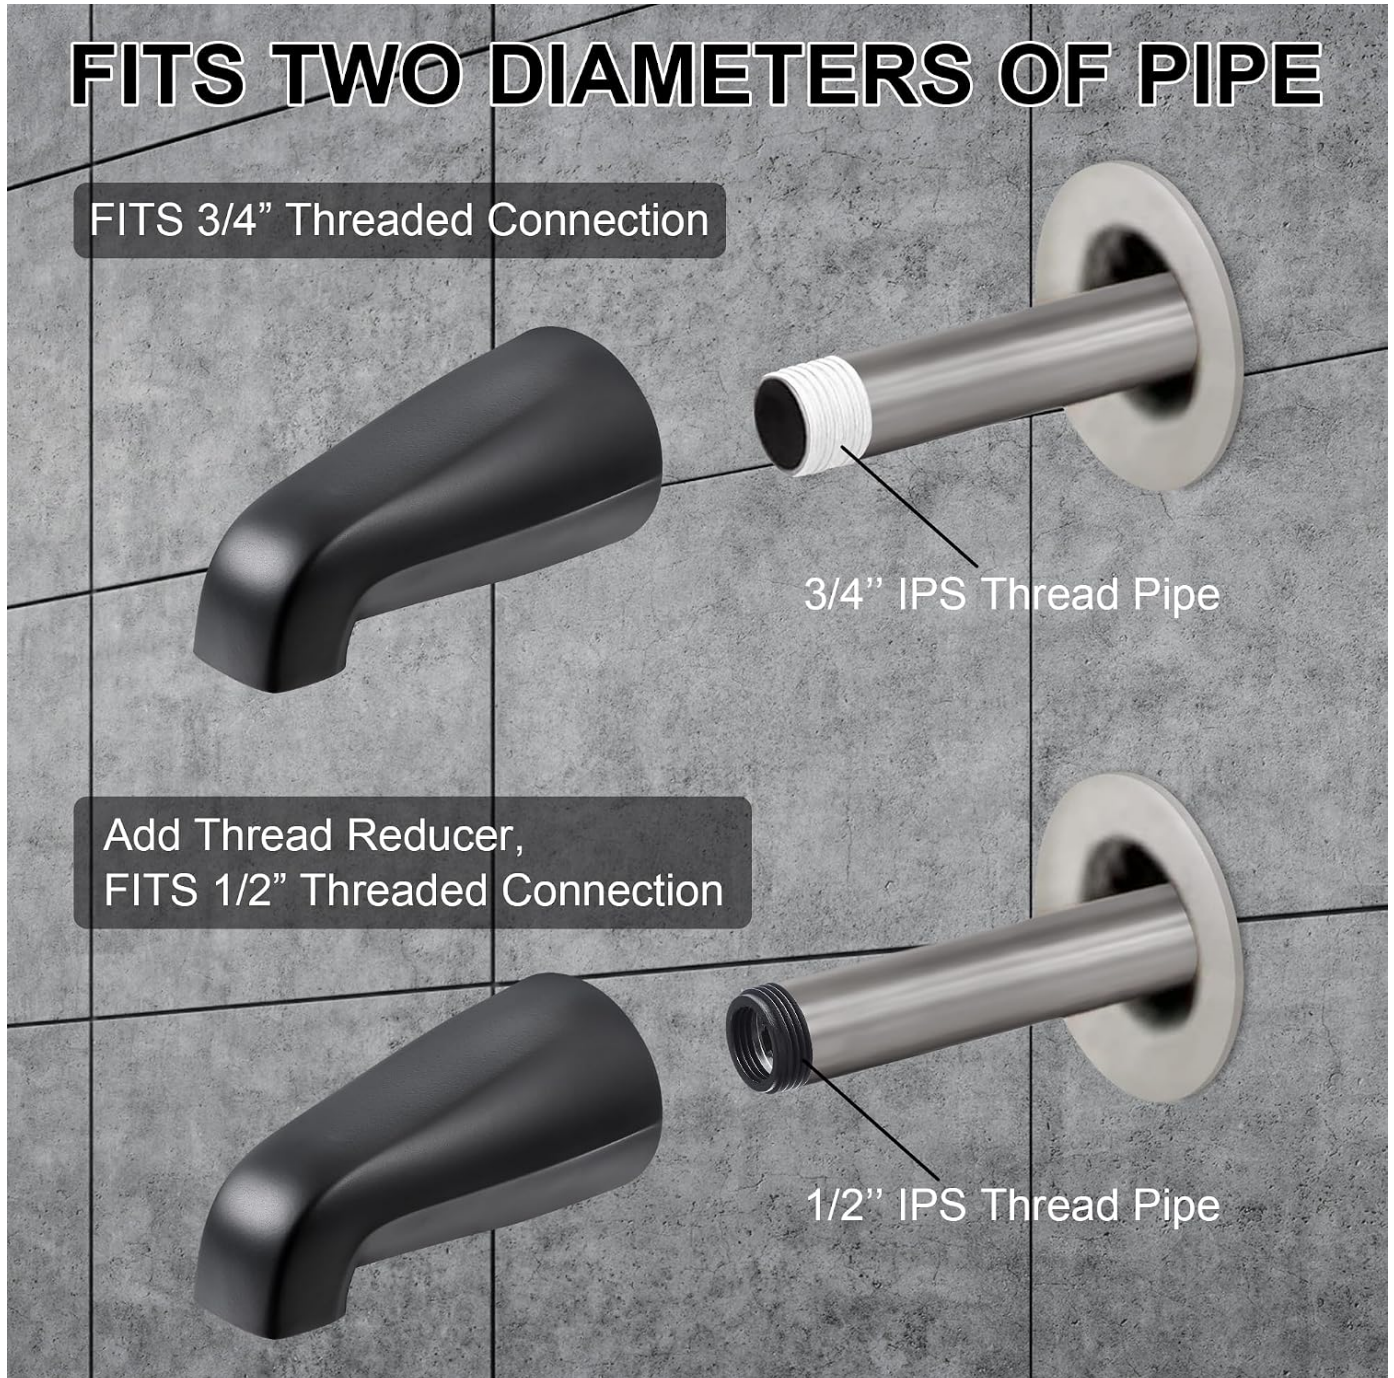

Image: This image demonstrates how the tub spout accommodates both 3/4" IPS threaded connections directly and 1/2" IPS threaded connections by adding the included thread reducer.

3. Install the Adapter (if necessary)

1. If your pipe is 1/2" IPS, thread the provided 1/2" to 3/4" adapter onto the pipe extending from the wall. Ensure it is hand-tightened, then use a wrench for a final quarter turn. Do not overtighten.
2. If your pipe is 3/4" IPS, the adapter is not needed.

4. Attach the Tub Spout

1. Apply plumber's tape (not included) clockwise around the threads of the pipe (or adapter, if used).
2. Thread the new Dreyoo tub spout onto the pipe/adapter by turning it clockwise.
3. Hand-tighten the spout until it is snug and facing downwards. Avoid using tools to tighten the spout directly, as this can damage the finish.

4. Ensure the spout is level and flush against the wall.

5. Final Check

1. Turn the main water supply back on.
2. Check for any leaks around the connection point. If leaks occur, turn off the water, re-tape the threads, and re-tighten the spout.

Video: This video provides a visual guide to the installation process for the Dreyoo Universal Bath Tub Spout, demonstrating how to use the adapter for different pipe sizes.

OPERATING INSTRUCTIONS

The Dreyoo Universal Bath Tub Spout is designed for straightforward operation:

- To fill the bathtub, turn on the hot and cold water supply using your existing faucet handles. Water will flow directly from the spout into the tub.
- This model does **not** include a diverter. If you require shower functionality, ensure your shower system has a separate diverter mechanism.

NO WATER LEAKAGE

Enjoy your bath

MAINTENANCE

To keep your Dreyoo tub spout looking new and functioning properly:

- **Cleaning:** Clean regularly with a soft cloth and mild soap or a non-abrasive bathroom cleaner. Avoid harsh chemicals, abrasive cleaners, or scouring pads, as these can damage the matte black finish.
- **Drying:** After each use, wipe the spout dry to prevent water spots and mineral buildup, especially in hard water areas.
- **Inspection:** Periodically check the connection for any signs of leaks or corrosion.

POLISHED CHROME

Make your bathroom more stylish and modern

TROUBLESHOOTING

Problem	Possible Cause	Solution
Water leaking from the base of the spout	Loose connection or insufficient plumber's tape.	Turn off water supply, remove spout, reapply plumber's tape to threads, and re-tighten the spout.
Spout does not fit flush against the wall	Pipe extending from the wall is too short or too long.	Ensure the pipe length is between 4" and 4-3/8". If not, plumbing modification may be required.
Water flow is weak	Debris in the spout or low water pressure.	Check for any obstructions in the spout. Consult a plumber if water pressure issues persist.

WARRANTY AND SUPPORT

Dreyoo products are manufactured with quality and durability in mind. For specific warranty details, please refer to the product packaging or contact Dreyoo customer support directly. If you encounter any issues or have questions regarding your tub spout, please reach out to our customer service team for assistance.
