2. Compatibility

This replacement charging cord is compatible with a range of Braun electric shavers. It is crucial to identify your shaver's specific **Type Number** to ensure correct compatibility. The Type Number is a four-digit number, typically starting with '5', found on your shaver.

Compatible Shaver Types and Models:

- **Types:** 5692, 5693, 5694, 5695, 5696, 5697
- **Models:** 720, 720s, 730, 740, 760, 760cc, 790, 790cc, 799cc, 9565, 9566, 9585, 9781, 9782, 9785, 9595, 9795, 7790, 7797, 7760, 7799, 7840, 7850, 7880, 7893, 7898, 7899

Video: This video demonstrates how to locate the Type Number on various Braun shaver models to ensure compatibility with replacement parts.

3. Setup

1. **Inspect the Cord:** Before first use, carefully inspect the charging cord for any signs of damage. Do not use if the cord is damaged.

2. **Connect to Shaver:** Insert the 2-pin connector end of the charging cord firmly into the charging port of your Braun electric shaver. Ensure a secure connection.
3. **Connect to Power Outlet:** Plug the other end of the charging cord into a standard electrical wall outlet.

4. Operating Instructions

Once the charging cord is properly connected to both the shaver and a power outlet, your shaver should begin charging automatically. Refer to your shaver's original user manual for specific charging indicators (e.g., LED lights) and recommended charging times.

- Ensure the shaver is turned **OFF** before connecting it to the charger.
- Do not attempt to operate the shaver while it is connected to the charging cord, unless specified by your shaver's original manual for corded operation.

5. Maintenance

Proper care of your charging cord will extend its lifespan and ensure safe operation.

- **Cleaning:** Disconnect the cord from the power outlet and shaver before cleaning. Wipe the cord with a dry, soft cloth. Do not use abrasive cleaners or immerse the cord in water.
- **Storage:** Store the cord in a dry place, away from direct sunlight and extreme temperatures. Avoid tightly winding the cord, which can cause damage.
- **Inspection:** Periodically check the cord for any signs of wear, cuts, or fraying. Replace the cord immediately if any damage is observed.

6. Troubleshooting

If your shaver is not charging, consider the following common issues:

- **No Power:** Ensure the wall outlet is functional by testing it with another appliance.
- **Loose Connection:** Verify that both ends of the charging cord are securely plugged into the shaver and the power outlet.
- **Damaged Cord:** Inspect the charging cord for any visible damage. A damaged cord should not be used and must be replaced.
- **Shaver Issue:** If the cord appears functional and connected correctly, the issue might be with the shaver's battery or charging port. Consult your shaver's original manual or a qualified technician.

7. Specifications

Feature	Detail
Brand	Braun
Item Model Number	7464507474082
Connector Type	2-Pin
Compatible Devices	Electric Shavers (Braun Pulsonic and Select Series 7)

Included Components	Charging cord
Special Feature	Fast Charging
Color	Black
Wattage	10 watts
Number of Items	1
Output Current	2 Amps
