## TROUBLESHOOTING

### Difficulty Aligning Parts During Assembly:

If you encounter difficulty aligning screw holes or fitting components together, ensure that all bolts are only partially tightened during the initial assembly steps. This allows for flexibility to adjust parts as needed. Once all components are loosely assembled and aligned, then proceed to fully tighten all bolts.

### Table Wobbles After Assembly:

Check that all screws and bolts are fully tightened. Ensure the table is placed on a level surface. If wobbling persists, loosen all screws slightly, gently press down on the table to ensure it's level, and then re-tighten all screws.

### Scratches on Floor:

The table legs are equipped with leg pads for noise reduction and floor protection. Ensure these pads are intact and properly positioned. If missing or damaged, replacement pads may be required.
