Zomolither 2+64G Android 13 Car Stereo for Honda Civic 2006-2011

Zomolither Android 13 Car Stereo User Manual

Model: 2+64G for Honda Civic 2006-2011

1. INTRODUCTION

Thank you for choosing the Zomolither Android 13 Car Stereo. This advanced in-dash navigation system is designed specifically for Honda Civic models from 2006 to 2011, offering a seamless blend of entertainment, navigation, and connectivity. With its 10.1-inch touch screen, powerful Android 13 system, and extensive features like wireless Apple CarPlay, Android Auto, Bluetooth, FM radio, Wi-Fi, and AHD backup camera support, your driving experience will be significantly enhanced. Please read this manual thoroughly to ensure proper installation and optimal use of all features.

2. PRODUCT FEATURES

- **Android 13 System:** Latest operating system with 2GB RAM and 64GB ROM for smooth performance and ample storage.
- **10.1-inch Touch Screen:** High-resolution 1024*600 display for clear visuals and intuitive control.
- **Wireless/Wired Apple CarPlay & Android Auto:** Seamless phone integration for navigation, calls, messages, and music via the "ZLink" app.
- **GPS Navigation:** Built-in offline map support ("Here We GO" for North America) and online map access via Wi-Fi.
- **Wi-Fi Connectivity:** Connect to Wi-Fi or a mobile hotspot for online maps, app downloads, and internet browsing.
- **Bluetooth:** Hands-free calling, Bluetooth music streaming (A2DP), and phone book auto-loading. Includes an external microphone for clear calls.
- **FM/RDS Radio:** Enjoy real-time stations with 18 preset options.
- **Hi-Fi Audio:** High-fidelity sound reproduction with a 16-band EQ for customized audio experience.
- **AHD Backup Camera:** Supports 720P high-definition input with 170-degree wide-angle view, waterproof design, super night vision, and backup assist lines.
- **Steering Wheel Control (SWC):** Compatible with original car steering wheel controls for convenient operation.

- **Dual USB Interface:** For connecting external devices and charging.

Apple Carplay & Android Auto

Sync your mobile phone for text messages, calls, navigation, and online music with our car stereo.

Image: The car stereo's display showcasing the Apple CarPlay and Android Auto interfaces, highlighting features such as GPS, messaging, music playback, dialing, and voice control.

Bluetooth

Hands-free calling, wireless music streaming

FM Radio

Experience real-time stations with 18 preset stations at your fingertips.

Built-in HiFi

Rediscover your music with high-fidelity audio that stays true to the original.

SWC Function

Operate radio functions effortlessly with SWC buttons.

3. PACKAGE CONTENTS

The following items are included in your product package:

- Android Car Stereo (with Frame)
- AHD Backup Camera
- External Microphone
- CANBUS (if applicable for your vehicle model)
- Power Cable
- Installation Tool
- GPS Antenna
- USB Cable (x2)
- RCA Cable

- User Manual (this document)

Size & Package List

Image: A comprehensive diagram illustrating the physical dimensions of the car stereo unit and a clear layout of all components included in the package, such as USB cables, video cable, tools, power cable, GPS module, RCA cable, user manual, camera, and microphone.

4. SETUP AND INSTALLATION

Professional installation is recommended. Ensure the vehicle's power is disconnected before beginning installation.

4.1. Backup Camera Connection

This section details the wiring process for the AHD backup camera. Proper connection ensures the camera view automatically displays when the vehicle is in reverse.

Video: Step-by-step guide on how to connect the AHD backup camera to the car stereo system, including connecting the video signal cable, power supply, and reverse trigger wire.

- Connect the yellow RCA video cable from the camera to the "CAM IN" port on the stereo.

- Connect the red wire from the camera's power cable to the positive terminal of the car's reversing light.
- Connect the black wire from the camera's power cable to the negative terminal of the car's reversing light (ground).
- Connect the short red trigger wire (labeled "BACK" or "REVERSE") from the stereo's wiring harness to the positive terminal of the car's reversing light. This signals the stereo to switch to the camera view when reverse gear is engaged.

5. OPERATING INSTRUCTIONS

5.1. Initial Power On and Interface Overview

Upon first power-on, the system will boot to the main interface. Navigate through the various applications and settings using the touch screen. The main screen typically displays navigation, music, and radio widgets for quick access.

5.2. Apple CarPlay & Android Auto

The ZLink app facilitates both wireless and wired connections for Apple CarPlay and Android Auto. This allows you to access your phone's features directly on the car stereo display.

Video: A demonstration of the car stereo's functions, including how to connect and use Apple CarPlay and Android Auto, showcasing the seamless integration of smartphone features.

Wireless Connection:

1. Pair your phone's Bluetooth with the car radio (device name: CarBT, PIN: 0000).
2. Open the "ZLink" app on the car radio.
3. For Android Auto Wireless, ensure the "Android Auto" app is installed on your phone.

Wired Connection:

1. Connect your phone to the car radio using the original USB cable.
2. Open the "ZLink" app.
3. For Android Auto Wired, ensure the "Android Auto" app is installed on your phone.

Note: If the connection is not successful, you may need to manually connect to Wi-Fi first. After manually connecting to the vehicle's Wi-Fi, delete the history record in the ZLink app, and then click ZLink again.

5.3. GPS Navigation

The unit comes with a built-in offline map APK, "Here We GO," for North America. You can also use online navigation by connecting to Wi-Fi.

- **Offline Maps:** To download additional offline map data, connect the stereo to Wi-Fi or your phone's hotspot. Enter the "Here We Go" app, go to Menu, then Download the map, and select the countries you need.
- **Online Maps:** With Wi-Fi connected, you can use Google Maps or other navigation apps downloaded from the Play Store.

WiFi Connection

Seamlessly access YouTube, TikTok, Spotify and more with WiFi hotspot connection.

GPS Navigation

Never lose your way again with our built-in GPS receiver and offline map support.

Image: The car stereo's screen displaying options for Wi-Fi connection and various GPS navigation applications, emphasizing seamless access to online and offline maps.

5.4. Bluetooth Functionality

Connect your smartphone via Bluetooth for hands-free calls and audio streaming.

- Go to the Bluetooth settings on the stereo and enable Bluetooth.
- On your phone, search for "CarBT" and pair. The default PIN is 0000.
- Once connected, you can make/receive calls and play music wirelessly.

5.5. FM/RDS Radio

Access your favorite radio stations with the built-in FM tuner.

- Select the Radio application from the main menu.
- Use the on-screen controls to tune to stations or use the preset options.

5.6. Hi-Fi Audio and EQ Settings

Customize your audio experience with the integrated Hi-Fi function and 16-band equalizer.

- Access the EQ settings from the audio player or main settings.
- Choose from preset styles (Rock, Pop, Jazz, Classic) or create custom settings.

5.7. Steering Wheel Control (SWC)

If your vehicle supports it, you can configure the stereo to work with your existing steering wheel controls.

- After correct wiring, go to the "Steering Learn" section in the settings.
- Follow the on-screen prompts to map your steering wheel buttons to the stereo functions.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Zomolither car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and unit. Avoid abrasive cleaners or solvents.
- **Temperature:** Do not expose the unit to extreme temperatures. The operating temperature range is -200C to 750C (-40F to 1670F).
- **Software Updates:** Periodically check for software updates to improve performance and add new features. Refer to the manufacturer's website or contact customer support for update procedures.
- **Avoid Liquids:** Prevent liquids from entering the unit, as this can cause damage.

7. TROUBLESHOOTING

If you encounter any issues, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Unit does not power on.	Incorrect wiring, blown fuse, insufficient power supply.	Check power connections (ACC, B+, GND). Verify fuses in the vehicle and on the stereo's harness. Ensure stable 12V power supply.
No sound.	Volume too low, incorrect audio output settings, speaker wiring issues.	Increase volume. Check audio output mode (Stereo). Verify speaker connections.
Backup camera not displaying.	Incorrect camera wiring, camera not powered, reverse trigger not connected.	Ensure camera video input (CAM IN) and reverse trigger wire are correctly connected. Check camera power supply.
Bluetooth/CarPlay/Android Auto not connecting.	Incorrect pairing, Wi-Fi hotspot issue, ZLink app issue.	Ensure Bluetooth is enabled on both devices. Re-pair devices. If using ZLink, try manually connecting to Wi-Fi hotspot first, then clear ZLink history and retry.
GPS signal weak or inaccurate.	GPS antenna placement, environmental interference.	Ensure GPS antenna is placed in an open area with clear sky view. Check antenna connection.

If the problem persists after trying these solutions, please contact customer support.

8. SPECIFICATIONS

Feature	Specification
System	Android 13
Memory (RAM+ROM)	2GB RAM + 64GB ROM
Screen Size	10.1 inches
Screen Resolution	1024*600
